

EMSD organises E&M I&T Day 2023 (with photos)

E&M I&T Day 2023, with the theme of smart construction, is being held today (July 31) and tomorrow (August 1) at the Hong Kong Science Park.

Organised by the Electrical and Mechanical Services Department (EMSD), with support from the Hong Kong Science and Technology Parks Corporation and the Shenzhen Association for Science and Technology, the event provides the trade a platform for experience sharing and interactive exchanges.

At today's event, the EMSD signed a memorandum of co-operation with the Association to establish strategic partnership to jointly support government departments in applying innovation and technology (I&T). It will strengthen the co-operation and exchanges between Shenzhen and Hong Kong, and the promotion of technology innovation.

The Director of Electrical and Mechanical Services, Mr Eric Pang, welcomed the Association to become the EMSD's I&T strategic partner. He said that this year marks the 75th anniversary of the establishment of the EMSD and it will continue to serve the community with heart and innovation, leverage its engineering expertise and collaborate with I&T strategic partners to assist government departments and the engineering sector to adopt I&T for the benefit of society.

E&M I&T Day 2023 brings together about 30 Hong Kong, Mainland and overseas exhibitors to showcase their I&T achievements and solutions in smart construction. Representatives from government departments, public organisations, I&T and electrical and mechanical sectors, and tertiary institutions also share their experience in smart construction.
