Engineering company fined after employee fall

An engineering company has been fined after a 31-year-old employee fell through a hole in a mezzanine floor during construction work being carried out in Bristol.

Bristol Magistrates' Court heard that on 13 November 2018, an employee of N&C Engineering Services Limited was involved with the installation of flooring at Albion Dockside Works, Hanover Place, Bristol. An opening had been cut in the boarded-out mezzanine floor through which the employee fell three metres to the ground, suffering serious head injuries.

An investigation by the Health and Safety Executive (HSE) revealed that the contractor failed to adequately plan, manage and monitor the construction work, so as to ensure that appropriate methods to prevent or mitigate a fall during the construction work, were in use.

Now-liquidated, N&C Engineering Services Limited of Binegar, Radstock, Somerset was found guilty of breaching Regulation 4(1) of the Work at Height Regulations 2005 and has been fined £1,000 and ordered to pay costs of £1,000.

Speaking after the hearing, HSE inspector, Ian Whittles said: "This incident so easily could have been avoided by simply carrying out correct control measures and safe working practices.

"Companies should be aware that HSE will not hesitate to take appropriate enforcement action against those that fall below the required standards."

Notes to Editors:

1. The Health and Safety Executive (HSE) is Britain's national regulator

for workplace health and safety. We prevent work-related death, injury and ill health through regulatory actions that range from influencing behaviours across whole industry sectors through to targeted interventions on individual businesses. These activities are supported by globally recognised scientific expertise. www.hse.gov.uk
