

Notice: The Wales Family Partnership: application made to abstract water

The Environment Agency consults the public on certain applications for the abstraction and impoundment of water.

These notices explain:

- what the application is about
- which Environment Agency offices you can visit to see the application documents on the public register
- when you need to comment by

Open consultation: Inshore Fisheries and Conservation Authorities conduct and operation (2014 to 2018): call for evidence

We're seeking evidence on how effectively and fairly Inshore Fisheries and Conservation Authorities (IFCAs) have operated between 2014 and 2018.

The evidence gathered will be used to prepare a statutory report into the conduct and operations of IFCAs.

Corporate report: Management of radioactive waste and materials inventory data

The [UK Radioactive Waste and Materials Inventory \(UK Inventory\)](#) provides comprehensive information on a wide range of radioactive waste and material produced by organisations in various sectors including energy, medical, research, industrial and defence.

These producers are responsible for managing information about the nature and

quantities of their inventories, as well as contributing data to a central collection that is updated every 3 years. This process is managed by the Nuclear Decommissioning Authority (NDA), and funded jointly with the Department for Business, Energy and Industrial Strategy (BEIS). The contract for the 2019 Inventory compilation and reporting is currently out to tender via the RWM Special Nuclear Services Framework Lot 3.

This approach seeks to review the NDA's strategy to collecting and compiling inventory data, considering whether a different approach for managing the UK Inventory could have a positive impact across the sector.

Different options are being reviewed following developments in recent years that include:

- the requirement to ensure the UK complies with international reporting obligations for spent fuels and nuclear materials
- the establishment of a national inventory forum that brings UK practitioners together to share learning
- introduction of new data management systems across Magnox and LLWR
- the EU referendum
- updated information on international inventory management practices

This paper identifies credible options, outlines how these were assessed and proposes a preferred option.

Please submit comments by 31 August to strategy@nda.gov.uk

Notice: RH5 6HN, Europa Oil and Gas Limited: environmental permit issued

Updated: The RSR standard rules set relevant to this permit has been added to the attachments.

The Environment Agency publish oil and gas mining waste permits.

This decision includes the permit, decision document and standard rules set for:

- Operator name: Europa Oil and Gas Limited
 - Facility name: Holmwood Wellsite
 - Permit number: EPR/YP3735YK/A001

[News story: More efficient, high-quality buildings: apply for funding](#)

UK organisations can apply for a share of up to £12.5 million for projects to transform how the construction sector delivers new buildings.

The funding is provided by [UK Research and Innovation](#) and delivered through Innovate UK.

The need to transform

There is a shortage of high-quality housing in the UK and we need more affordable, energy-efficient and healthier places to live and work. This is creating demand to produce buildings more quickly, safely and with lower emissions.

For this to happen there has to be a revolution in the construction sector. Currently it lags behind other industries for productivity – and hasn't changed much in more than 40 years.

So through the [Industrial Strategy Challenge Fund](#) government is supporting a transformation of UK construction.

[Find opportunities for business and research to transform construction.](#)

The £170 million government investment, matched by £250 million from industry, will create new construction processes and techniques for building manufacture.

This £12.5 million funding competition is one element of the programme, which also includes funding for research, a new construction network and the creation of an active building centre and innovation hub.

It is a core part of the [Construction Sector Deal](#), which sets out its vision for a future-proofed sector that can provide affordable, energy efficient homes in days or weeks, rather than months, and at a third of the cost.

[Find out more about the Industry Sector Deals](#) and how they're supporting [the modern Industrial Strategy](#).

Tackling the construction lifecycle

We are looking for projects that address the 3 main stages of the construction lifecycle. Specifically, they should focus on how we:

- design and manage buildings, such as using digitally-enabled performance

management systems

- construct high-quality buildings, taking a manufacturing approach
- power those buildings, for example, through the use of active energy components

The idea proposed should ultimately lead to cost savings, reduced delays and improvements in collaborations, productivity and outputs.

Delivering the modern Industrial Strategy

To meet the objectives of the Industrial Strategy Challenge Fund, projects must do one or more of the following:

- encourage the adoption of design approaches that favour pre-manufacturing and assembly
- increase productivity on construction projects
- develop scalable methods to speed up construction and provide greater certainty over budget and time
- develop integrated building components that generate, manage and store energy at lower costs
- reduce the construction and whole-life costs of built assets
- improve the whole-life value and safety of built assets, while reducing the carbon impact of that asset

Depending on the length, projects can be for feasibility studies, industrial research or experimental development.

Competition information

- this competition opens on 23 July 2018, and the deadline for applications is midday on 19 September 2018
- a UK business must lead the project, working with other businesses, research, public sector or third sector organisations. At least one SME must be involved
- total project costs can be between £25,000 and £500,000 for projects that last 6 to 12 months, or between £250,000 and £1 million if they last 12 to 24 months
- you could attract up to 70% of your project costs
- projects must start by December 2018
- as part of the competition you can attend a briefing event, where you'll find out more about how to create and submit a quality application.

Register for:

- [London](#) or [an online webinar](#) on 23 July 2018
- [Bristol](#) on 24 July 2018
- [Birmingham](#) on 25 July 2018
