

# [News story: Litter Innovation Fund: Government backs new community projects](#)

A range of innovative projects to tackle litter louts in local communities have been awarded funding by the government, Environment Minister Thérèse Coffey has announced today (9 March 2018).

The first round of funding sees a [number of councils, charities, businesses, and public projects](#) awarded almost £125,000 to take innovative steps to tackle littering in their communities.

The successful projects include developing bins to prevent seagulls from scattering litter on beaches and working with river users to reduce plastic getting into rivers, helping to tackle the issue of litter getting into our marine environment.

The funding builds on the Government's wider [Litter Strategy for England](#), as well as the recent launch of the [25 Year Environment Plan](#) setting out how Government will protect and enhance our natural environment.

Welcoming the new projects, Environment Minister Thérèse Coffey said:

We want to be the first generation to leave our environment in a better state than we found it and these innovative new projects will help reduce the amount of litter which so often plagues our streets, parks, countryside, rivers and marine environment.

We have all seen the damaging effects that litter can have on wildlife and the environment, and I encourage people to do their bit, take responsibility for their litter and recycle more.

Communities Minister Rishi Sunak said:

The Litter Innovation Fund is part of our wider strategy to deliver a substantial reduction in litter and littering while leaving a cleaner, greener and tidier environment for the next generation.

I am looking forward to seeing these projects supporting that strategy while helping communities make a real difference in their area.

Government has recently announced a range of new measures to tackle waste including proposals to extend the 5p plastic bag charge to small retailers and introducing a ban on plastic microbeads.

Keeping the country's streets clean cost local Government almost £700 million last year. Much of this is avoidable litter, and money that could be better spent in the community. Despite this, a worrying 1 in 5 people admit to dropping litter.

A second round of applications will be launched shortly.

## Background

- The Litter Innovation Fund was set up as part of the Government's Litter Strategy for England which was launched in April 2017 as is administered by the sustainability not-for-profit charity WRAP. A total of £450,000 is available for funding to local projects.
- Applications are assessed consistently and against published criteria.
- The funding is evenly provided by the Department for Environment, Food & Rural Affairs and the Department for Communities and Local Government and funding awarded is limited to a maximum of £10,000 per project. Projects must also secure match funding.
- The cost of £682m in 2016/17 for street cleaning is from [Official local Government returns to DCLG](#).
- Research on one in five admitting to having dropped litter in the past is from Keep Britain Tidy – Litter Droppers Segmentation research (2010).

## [Press release: Waste vehicle seized from gang](#)

A vehicle belonging to an organised gang operating in South East England has been seized by the Environment Agency and Thames Valley Police, as part of an ongoing waste crime investigation. The vehicle is believed to be linked to the operation of an illegal waste site in the Maidenhead area.

The seizure, which took place last week, comes as the Environment Agency and the police move forward in their investigation to capture those responsible for occupying land unlawfully and accepting tonnes of waste, often from unsuspecting sources, leaving behind the rubbish to be cleared at the expense of the landowner or taxpayer.

Illegal waste crime drains the UK economy of £1 billion each year in clean-up costs and lost tax revenues. It has a devastating effect on the environment and local communities with pest infestations and fires, which could lead to water and land contamination plus air pollution from smoke.

Nick Daykin, Environment Agency Enforcement Team Leader, said:

This is a great result in an ongoing investigation with Thames Valley Police to apprehend a group of unscrupulous individuals. The power to seize vehicles is a relatively new and is now an important weapon in our armoury for disrupting this type of criminal activity. This is a big message to the criminal fraternity: you set up site yesterday, we will have one of your vehicles off the road today and we will do it again tomorrow!

Using illegal waste dealers may seem tempting in terms of cost, but it can help fund organised crime. Everyone has a responsibility for their own waste and if your waste is found at an illegal site you could be facing fines of up to £5,000. To avoid this, we encourage members of the public and local businesses to ask their waste carrier for proof of their Waste Carrier's Registration and to ask to see a 'waste transfer note' and if possible take a photo of it on their phone.

## [Closed consultation: Cycling and Walking Investment Strategy \(CWIS\) safety review](#)

*Updated:* Summary of responses added.

Invites those with an interest in improving safety of cyclists and pedestrians to provide evidence, drawing on experience from the UK or other countries, that can be used to shape future policy decisions.

This call for evidence forms part of the wider consultation on road safety issues related to cycling – [phase 2 of the Cycle Safety Review, announced in September 2017](#).

A [factsheet on pedal cycle casualties](#) is available.

## **Notice: Environment Agency: proposal made to revoke licences 9 March 2018**

The Environment Agency consult the public on certain applications for the abstraction and impoundment of water.

These notices explain:

- what the application is about
  - which Environment Agency offices you can visit to see the application documents on the public register
  - when you need to comment by
- 

## **Press release: Skip-It Torbay to pay thousands for skipping on asbestos removal**

A South Devon waste processing company has been ordered to pay £16,404 in fines and costs for failing to remove thousands of tonnes of hazardous waste from two sites in Torbay.

The case was brought by the Environment Agency.

Armabridge Ltd, trading as Skip-It Torbay, operates from a waste transfer station at Barton Hill Way, Torquay. In June 2015 an Environment Agency officer discovered asbestos contamination in a pile of approximately 3,200 tonnes of residual waste at the site. In March 2016, following a lack of progress in dealing with the waste, the Environment Agency served an enforcement notice on the company to formalise the removal of the asbestos-affected material.

The company appealed against the enforcement notice, but the appeal was later dismissed by a planning inspector, who in January 2017 upheld the enforcement notice and gave the company 3 months to comply with its requirements.

In May 2017 an environment officer returned to the site and saw the pile of waste was still present. No significant progress had been made to remove it

and as a result the company had breached its enforcement notice.

In January 2016, Armabridge Ltd was prosecuted for illegally depositing approximately 2,000 tonnes of asbestos contaminated waste at a second site, Kerswell Gardens, Torquay. In February 2017, following a lack of progress in clearing the waste, the Environment Agency served an enforcement notice requiring that the waste be removed.

In July 2017 an Environment Agency officer returned to the Kerswell Gardens site and found the hazardous waste was still present and that the enforcement notice had been breached.

Jacob Hess, for the Environment Agency, said:

This case emphasises the importance of robust waste acceptance procedures. Failure to segregate wastes appropriately can lead to complex and costly remediation at a later date.

We have recently run a campaign with local roofing businesses and waste operators to raise awareness of asbestos containing materials and how to correctly dispose of them.

Armabridge Ltd was fined a total of £13,334 and ordered to pay £3,070 costs by Plymouth magistrates after pleading guilty to 2 offences of failing to comply with enforcement notices relating to Barton Hill Way and Kerswell Gardens, Torquay contrary to Regulation 38(3) of the Environmental Permitting (England and Wales) Regulations 2010. The company has been given until 30 September 2018 to safely dispose of waste from both sites.
