

News story: Top accolade for nuclear record-keeping

'Place of Deposit' (PoD) status was granted by The National Archives at Kew (TNA) and National Records of Scotland in December 2017, on schedule, after a comprehensive assessment of all operational aspects at the £20 million facility near Wick. It is one of the largest repositories outside London to be accredited by the TNA.

This means Nucleus (The Nuclear and Caithness Archives) has met all the UK's stringent criteria for the safeguarding, preserving and cataloguing of important public information on behalf of the government.

Martin Robb, Programme Manager for the Nuclear Decommissioning Authority's (NDA) Information Governance Programme, which is responsible for records management, said:

Our specialist contractor, Restore Ltd, has worked incredibly hard to secure Place of Deposit status and we're extremely proud of their achievement.

The news comes just weeks after the facility's sleek, angular lines impressed judges in the annual Architects' Journal awards, collecting two of the top trophies: Editor's Choice and Public Building of the Year. Edinburgh-based Reiach and Hall Architects feature the stunning design on the home page of their website.

Nucleus, located next to Wick airport in Caithness, Scotland, opened its doors for business early in 2017 and a programme is currently under way to transfer records from all the NDA's sites across UK, estimated to take four years. This painstaking 'sift and lift' process requires millions of documents to be examined before being either destroyed or carefully indexed and packaged for the move north.

Eventually, decades-worth of NDA records, both digital and hard copy, will be housed at Nucleus where they will be available for ongoing research. Importantly, Nucleus is also the central repository for the vital waste records associated with delivering a geological disposal facility and deferred decommissioning.

Dounreay's photographic collection was the set of first nuclear records transferred to Nucleus, followed by the industry-wide epidemiological records.

Martin added:

With PoD status now secured, we can really begin the full-scale

transfer of records. The collection from Harwell is next in line, followed closely by Dounreay records and then the stored material from Hinton House and other stores in Warrington.

Each collection of records requires a full programme of careful examination, destruction where appropriate – duplicates for example – and then indexing, packaging, transfer, preservation if required and cataloguing at Nucleus.

Sellafield alone has more than 130,000 boxes of archived records in off-site storage, plus material on site and in various offices. Magnox Ltd, with 12 sites, has a similar-sized collection in storage – estimated as stretching, if laid out, to more than 120km worth of paperwork. The number of electronic records held across the estate, meanwhile, is believed to number hundreds of millions.

Environmental, Social and Human Rights policy

As part of our support to UK exporters and in line with our international commitments, we identify and, where appropriate, conduct due diligence to assess the [Environmental, Social and Human Rights](#) (ESHR) risks and impacts of projects we are asked to support overseas.

The [Policy and Practice on ESHR Due Diligence and Monitoring statement](#) informs exporters, banks, project sponsors and other interested parties on our arrangements for:

- identifying ESHR risks and impacts and carrying out due diligence to be satisfied that, as far as practically possible, we support projects which should be constructed and operated in line with relevant standards
- monitoring alignment of projects with relevant ESHR standards over the life of UKEF support

Our note on [Human Rights and Social Risks and Impacts](#) describes UKEF's approach to identifying and managing social and human rights risks and impacts of projects we are asked to support overseas.

The [ESHR flowchart](#) shows the processes we follow when considering environmental, health, safety, social and human rights impacts.

The [Export Guarantee Advisory Committee](#) advises the Secretary of State for International Trade on our operations, including ESHR risks.

The Equator Principles

We adopted the [Equator Principles](#) in 2016. This is a global framework for ESHR decision-making in financing projects. Find out more about our [commitment](#).

- [26 June 2017: UK Export Finance joins Equator Principles steering committee](#)
- [4 November 2016: UKEF's implementation of the Equator Principles](#)
- [31 March 2016: UKEF adopts Equator Principles](#)

Our announcements

UKEF supports UK companies export all over the world. Our latest projects include:

- [Bee'ah's headquarters](#), designed by the late Dame Zaha Hadid and built by Carillion, which will be the first building of its kind in the city of Sharjah to be powered entirely by renewable and recoverable energy sources, whilst using recycled materials in its construction

Category A projects

Category A projects are those with the potential to have significant adverse environmental and/or social impacts.

We update our list of [Category A projects](#), whenever we consider or support a Category A project.

ESHR risk and impact categorisations

We publish data on new and existing ESHR risk and impact categorisations and contingent liabilities as part of our Annual Report and Accounts:

- [Environmental, Social and Human Rights risk and impact categorisations 2016 to 2017](#)
- [Environmental, Social and Human Rights risk and impact categorisations 2015 to 2016](#)

[News story: Committee on Radioactive Waste Management \(CoRWM\) recruiting new Chair](#)

CoRWM provides independent scrutiny and advice to UK government and devolved administration ministers on the long-term management of radioactive waste, including storage and disposal. The committee's primary task is to provide independent scrutiny on the UK government's and Radioactive Waste Management Ltd's high profile programme to deliver geological disposal, together with interim storage, for higher activity wastes.

The role of the CoRWM Chair is high profile and the Chair may be required to appear before Parliamentary Select Committees. The Chair is also the committee's main point of contact with stakeholders and will represent the committee's views to both broadcasting and written media (where required).

The Chair will be appointed for a single term of 4 years, renewable for a further term at the discretion of the Secretary of State.

Further information and details of how to apply are available on the public appointments website:

<https://publicappointments.cabinetoffice.gov.uk/appointment/chair-24/>

The closing date for applications is 23:00 on 19 February 2018.

Notice: NR16 1QU, AD and TGF Harvey: environmental permit application advertisement

The Environment Agency consults the public on certain applications for waste operations, mining waste operations, installations, water discharge and groundwater activities. The arrangements are explained in its [Public Participation Statement](#)

These notices explain:

- what the application is about
- how you can view the application documents
- when you need to comment by

The Environment Agency will decide:

- whether to grant or refuse the application
- what conditions to include in the permit (if granted)
