

[News story: Multi-Agency Flood Plan \(MAFP\) Review: Terms of Reference](#)

The Environment Secretary, Michael Gove, has made a [Written Ministerial Statement](#) in parliament announcing that Defra and the Environment Agency (EA) will be undertaking a review of multi-agency flood plans produced by local resilience forums (LRFs).

These plans are used by local responders (including the emergency services, local authorities, local NHS and others) to coordinate their response to flood incidents.

The MAFP Review is part of the government's ongoing work to address flood risk. We are investing £2.5 billion to better protect the country from flooding: this includes over 1,500 flood defence schemes, which will better protect more than 300,000 properties by 2021. As we approach winter, we have improved our capability to deploy military assistance and invested in our ability to respond to flooding: the Environment Agency now has 25 miles of temporary barriers and we have 1,200 military troops trained to assist in flood response.

Terms of Reference – Multi-Agency Flood Plan (MAFP) Review

The MAFP Review is a Defra and Environment Agency review initiated by the Secretary of State for Environment, Food and Rural Affairs.

The review will be led and overseen by an independent external reviewer, Major General Tim Cross CBE (retired). General Cross will be supported by a steering group of external experts in resilience and emergency planning, including from LRFs.

The review will address the question, 'Do LRFs have robust plans in place to respond to flooding incidents in their respective areas?' It will have three workstreams:

- Workstream 1: Assessment of current MAFPs. This will be taken forward by the EA. It will involve the assessment of around 30 strategic flood plans and over 600 tactical flood plans related to specific districts and communities.
- Workstream 2: A qualitative review led by the external reviewer, supported by Defra and the EA. This will involve visiting LRFs, identifying good practice, identifying issues and obstacles, and forming views and recommendations on the way forward including criteria for new guidance.

- Workstream 3: Revision of Defra guidance to LRFs on how to produce good MAFPs, taking into account lessons learnt and experience since 2011 when the guidance was last reviewed. This will be undertaken by Defra and the EA, overseen by the external reviewer.

The review is due to be completed by the end of May 2018, culminating in the publication of revised guidance and a report of findings.

The external reviewer will be supported throughout by Defra and Environment Agency staff. It is envisaged that the external reviewer's focus would be primarily on workstreams 2 and 3.

News story: Busiest ever year as event goes on growing

The visitors, from all across the UK and overseas, enjoyed a day of exhibitions and informal networking at the Nuclear Decommissioning Authority (NDA) Estate Supply Chain Event.

Businesses came to Manchester's EventCity venue to be involved in one of the world's largest nuclear decommissioning supplier events, with delegates turning up from all across the UK and overseas.

Informal networking in the Innovation Zone

The NDA and its business units set up the first event 7 years ago with the aim of creating greater visibility of opportunities for suppliers and in particular for Small and Medium-sized Enterprises (SMEs). The event has gone from strength-to-strength and has become a highlight of the nuclear industry calendar, with around half the visitors coming from the SME community.

The day was formally opened by NDA Chief Executive David Peattie, who spoke about the importance of suppliers in providing skills and innovation for the decommissioning mission.

The main hall held 300 exhibition stands, staffed by a wide range of technical and service suppliers, alongside information stands representing the NDA and all its business units, government bodies and regeneration organisations.

The ever-popular 'Innovation Zone', supported by the government's Innovate UK, hosted more than 40 exhibitor companies, who held demonstrations of leading-edge technologies during the afternoon.

The Skills Zone also returned for 2017, featuring a range of organisations who were able to offer guidance, advice and one-to-one discussions.

Other government departments attending included:

- The Ministry of Defence's Submarine Enterprise Programme
- Department for International Trade
- the Crown Commercial Service

- the Welsh Government

Ron Gorham, the NDA's Head of Supply Chain Optimisation and SME Champion, said:

We have a challenging mission for decades to come which relies on vibrant, dynamic businesses providing solutions to our many challenges. Success across our estate and also the MOD's Submarine Enterprise Programme is good not only for the UK, local and national economies, but also provides fulfilling careers for a whole new generation.

We remain committed to working with the supply chain, from the largest to the smallest players, to improve not only the quality of the opportunities but also help ensure successful outcomes for all.

Informal feedback during the day suggests that yesterday's event was the most successful so far. It provides a unique opportunity to hear leading figures from across our sector, see world-beating technology and enjoy an unrivalled opportunity for networking with other businesses suppliers and clients.

The event remains a key element of our Supply Chain Development programme and the SME action plan both of which show NDA's continued commitment to encourage, support and develop our supply chain for today and for the future.

One of the morning highlights was the [presentation of NDA estate awards](#).

Updated: Programme update

The UK will host a pavilion in the Bonn Zone of COP. Through our programme of talks, events and presentations we aim to showcase the UK's role in tackling climate change, sharing innovations that will drive the future of the Paris Agreement. We hope that sharing our experiences and expertise can be useful for other countries in taking forward action on their climate commitments, and are keen to explore areas for collaboration in the future.

Our programme will cover a broad range of topics across the climate and clean growth agenda, UK renewable energy, green finance, climate policy (including the Clean Growth Strategy), transport and more.

The UK is playing a leading role in the low carbon transition both nationally and internationally. We were the first country to legislate to reduce carbon emissions with the 2008 Climate Change Act, and have been among the most successful countries in the developed world in growing our economy while reducing emissions. Since 1990, the UK has cut emissions by 42 per cent while our economy has grown by 67%. Our recently launched Clean Growth Strategy builds on this, bringing together for the first time over £2.5 billion of Government funding for low carbon innovation from 2015 to 2021.

Please come and join us at COP 23 in Bonn.

The programme of the pavilion can be viewed below for week 1 and week 2.

[Notice: LN2 3PU, Island Gas Limited: environmental permit application advertisement](#)

The Environment Agency consults the public on certain applications for waste operations, mining waste operations, installations, water discharge and groundwater activities. The arrangements are explained in its [Public Participation Statement](#)

These notices explain:

- what the application is about
- how you can view the application documents
- when you need to comment by

The Environment Agency will decide:

- whether to grant or refuse the application
 - what conditions to include in the permit (if granted)

[News story: Undulate ray survey – VIId](#)

In 2017 the European Commission granted the UK and other member states quota

for undulate ray in specific areas.

The UK has 2 tonnes of remaining quota for ICES area VIIId which can be used for scientific research.

Currently undulate ray caught in VIIId is under restrictive management and vessels involved in the survey will be required to complete a log-sheet and follow certain conditions while operating under dispensation.

It is anticipated that participating vessels will be restricted to 100kg live weight per trip but this will depend on the number of vessels that take part. Approximately 6 vessels that collectively fish across the range of area VIIId are required.

If you would like to be considered to take part please email dispensationrequests@marinemanagement.org.uk or telephone 0208 2 256947 by 8am on the 13 November 2017.
