Corporate report: Generic Disposal System Safety Case for a Geological Disposal Facility: design

These documents are intended to provide information on the work RWM, as the developer of a GDF, has undertaken on the development of a number of illustrative designs for geological disposal in the UK.

- Generic Transport System Designs
 - Generic Disposal Facility Designs
-

Corporate report: Generic Disposal System Safety Case for a Geological Disposal Facility: knowledge base

This section includes background documents and reports about aspects of the safety case as well as the suite of research status reports.

- Technical background to the generic Disposal System Safety Case
- Disposal System Safety Case: Data Report
- Safety case production and management
- Waste packages and the assessment of their disposability
- Waste package evolution status report
- Engineered barrier system status report
- Geosphere status report
- Biosphere status report
- Gas status report
- Behaviour of radionuclides and the non-radiological species in groundwater status report

- Waste package accident performance status report
 - Criticality safety status report
-

[Corporate report: Generic Disposal System Safety Case for a Geological Disposal Facility: disposal system specification](#)

The Disposal System Specification is described in four documents:

- Disposal System Specification Part A: High Level Requirements
 - Disposal System Specification Part B: Technical Specification
 - Derived Inventory Report
 - Derived Inventory: Scenarios Report
-

[Corporate report: Generic Disposal System Safety Case for a Geological Disposal Facility: transport safety assessment](#)

Transport Safety Assessment

- Generic Transport System Safety Assessment
- Transport Package Safety Report
