The fish counter at the Tees Barrage only monitors the upstream migration of salmon and sea trout through the fish pass.

Additional routes exist through the:

- main barrage gates
- canoe slalom
- turbine fish pass
- navigation lock

To help fish migrate, the Environment Agency and the Canal and River Trust keep the main barrage gate open as much as possible. When it's open, more fish migrate through this gate than through the fish pass. This may explain the lower fish counts when the main barrage gate is open.

[Statistical data set: River Tyne fish counts](#)

Updated: Latest fish count data for the River Tyne.

We aim to release this data once a month.
