

## **Notice: BD4 7TT, Kemira Chemicals (UK) Limited: environmental permit issued**

The Environment Agency publish permits that they issue under the Industrial Emissions Directive (IED).

This decision includes the permit and decision document for:

- Operator name: Kemira Chemicals (UK) Limited
- Installation name: Bowling Park Drive Chemicals
- Permit number: EPR/TP3737SB/V003

---

## **Notice: P030 5TS, Ringway Island Roads Limited: environmental permit application advertisement**

*Updated:* Amended the end date of the consultation

The Environment Agency consults the public on certain applications for waste operations, mining waste operations, installations, water discharge and groundwater activities. The arrangements are explained in its [Public Participation Statement](#)

These notices explain:

- what the application is about
- which Environment Agency office you can visit to see the application documents on the public register
- when you need to comment by

The Environment Agency will decide:

- whether to grant or refuse the application
  - what conditions to include in the permit (if granted)
-

# Press release: Doncaster teens take lead on environmental improvements

The children at XP Secondary School have been working with experts from the Environment Agency and Yorkshire Wildlife Trust to research and improve how surface water drains away from the land.

Their findings have helped with the installation of a new sustainable drainage system (SUD) on the school's grounds, designed to mimic nature in the way it allows water to soak away.

Dave Newborough from the Environment Agency said:

SUDs help slow down the flow of surface water, giving it time to soak into the ground and for pollutants to be naturally filtered out before entering local watercourses.

In doing so, they help reduce the risk of flooding and improve water quality, as well as enhance the environment for people and wildlife.

XP's students carefully studied their school grounds, carrying out environmental experiments to determine how a SUD would work best. They presented their findings to a panel of experts, including Yorkshire Wildlife Trust, before helping to plant hedges that form an important part of the new drainage system.

The project has given the kids a real sense of ownership in their local water environment, which they can pass on to their family and friends," says Dave.

They've also learnt first hand how the water cycle works and how it can be affected by urbanisation and pollution. And they've had the opportunity to explore local wetland at Yorkshire Wildlife Trust's Potteric Carr Nature Reserve, discovering its importance for biodiversity and for managing flood risk.

The work at XP Secondary School is part of Inspiring Water Action in the Torne (iWAIT), an Environment Agency led project restoring almost 50 hectares of rare wet woodland priority habitats at 7 sites in Doncaster.

Around 450 children and young people across 7 schools, each linked with one of the woodland sites, are using the project to learn about flood risk, water quality and management, and ecology.

Three of the schools, including XP, will have SUDs fitted to manage the quantity and quality of surface water feeding the restored wetlands, as well as helping to involve young people in environmental activities and learning.

iWAIT is a Torne Catchment Partnership project led by the Environment Agency and involving Yorkshire Wildlife Trust, Doncaster Metropolitan Borough Council, Natural England and local communities.

ENDS

## Notes for editors

- The iWAIT project is turning 46.5ha of non-priority habitat into priority habitat – this is 11% of the Environment Agency’s nationwide target 400ha for habitat creation.
- A priority habitat is one identified as being the most threatened and requires conservation action under the UK Biodiversity Action Plan.
- Wet woodland is a biodiversity habitat, important for animals and plants. It supports a large number of species, many of which are now rare in the UK.
- For more information on the iWAIT project, see this [previous news release](#).
- Yorkshire Wildlife Trust is a local charity which works to create a Yorkshire rich in wildlife for the benefit of everyone. Our goal is nature’s recovery, on land and at sea. We stand up for Yorkshire’s wildlife wherever it is under threat, and work with others to find solutions that benefit both wildlife and people. We inspire thousands of children, families and others every year, reconnecting them with their local environment and wildlife. With the support of these people, we are restoring and recreating a habitats in Yorkshire and raising awareness of, and fighting for, Yorkshire’s seas.

## [Consultation outcome: 2016 Supplementary Licensing Round draft Screening & Appropriate Assessment](#)

*Updated:* Final HRA document published

The draft HRA screening and Appropriate Assessment of Blocks applied for in the 2016 Supplementary Seaward Licensing Round has now been issued for public consultation.

Following the announcement of the 2016 Supplementary Seaward Licensing Round by the Oil and Gas Authority, applications were received covering 11 whole or

part Blocks located in the northern North Sea, outer Moray Firth, central North Sea and southern North Sea. Of those applied for, a number in the southern North Sea are subject to Appropriate Assessment (AA).

## **Press release: Man fined for running illegal waste site**

A Gateshead man has been fined and ordered to pay thousands of pounds in compensation after he illegally stored waste at a site and then abandoned it.

John James Armstrong, 52, of Park Lane, Winlaton Mill, appeared at North Tyneside Magistrates' Court on Friday 7 April.

He pleaded guilty to one offence of operating a waste site without a permit.

He was fined £1,000, ordered to pay compensation of £7,069.49 to the landowner to cover the costs they paid to clear the site, and £1,591.26 costs.

Armstrong was Director of Canterhall Builders Limited, a construction company which dissolved on 23 May 2016.

Prosecuting on behalf of the Environment Agency, Simon Crowder told the court that on 20 April, 2016, two Environment Agency officers attended the unit at Unit 1 Felling Business Centre, Green Lane.

They saw the site was covered in construction waste, including bricks, broken concrete, wood, plaster board, insulations, pallets, old kitchen units, benches and electrical waste. There was also a skip full of building waste.

Enquiries revealed that Canterhall were tenants at the site but had abandoned it earlier in the month.

On 16 May a letter requesting removal of the waste was given to the landowner.

On 23 May Environment Agency officers traced the defendant to a site in Swalwell, where he was given a letter inviting him to be interviewed.

Two days later the site at Felling was cleared by the landowners, at a total cost to them of more than £7,000.

The defendant has no previous convictions and was co-operative during the investigation.

During an interview on 2 June he said that if it was not cost effective to hire a skip to remove waste from carrying out construction work, then he would instead transport the waste back to the unit. When there was enough

waste at the unit he would then order a skip to have it removed.

He said in January 2016 more and more waste was deposited at the unit and due to financial problems he could not afford skips to get the waste removed. He said he left the unit on 10 April and had made no attempts to clear the waste.

He added he was unaware of the need for an environmental permit or registered exemptions.

The Environment Agency's Paul Whitehill said:

We take waste crime very seriously. It can cause serious pollution to the environment, put communities at risk and undermine local businesses.

The defended flouted the law for financial gain – he cut costs by not hiring skips at the sites where work was taking place to ensure disposal of the waste.

He also avoided the cost of an environmental permit and annual subsistence fees. Illegal waste activities that avoid regulatory controls don't have the appropriate infrastructure to protect the environment, and can have a detrimental impact on local communities.

The sentence follows calls from the Environment Agency warning landowners about criminals looking to profit by dumping waste illegally on their land.

Landowners can often find their property filled with waste and abandoned by tenants, leaving owners with an expensive clean-up bill. The Environment Agency is cracking down on waste crime and taking tough action to deal with this behaviour.

This ruling demonstrates that people can be made to pay for the cost of clearing the mess they leave behind.

Information and advice about environmental permits can be found on the Environment Agency website. To report illegal waste activity contact Crimestoppers on 0800 555 111.
