

[Detailed guide: Access the public register for environmental information](#)

Updated: Updated link to access end of life vehicle authorised treatment facilities public register.

Use the links below to access the public register for:

- [Electronic Public Register homepage](#)
- [environmental permits for waste operations](#)
- [environmental permits for end of life vehicle authorised treatment facilities](#)
- [environmental permits for industrial installations](#)
- [environmental permits for discharge consents to water and groundwater](#)
- [environmental permits for radioactive substances](#)
- [waste carriers, brokers and dealers](#)
- [waste exemptions](#)
- [water quality exemptions](#)
- [scrap metal dealers](#)
- [enforcement actions](#)

Waste carrier, dealer and broker licences

From 1 April 2016 for all waste carriers, dealers and brokers registration, please use the [Waste Carriers register](#)

Waste electrical and electronic equipment (WEEE)

The Environment Agency hold the registers for WEEE:

- [EEE producers](#)
- [WEEE approved producer compliance schemes](#)
- [WEEE approved authorised treatment facilities and approved exporters](#)

Packaging and batteries

We have public register information on the [National Packaging Waste Database](#).

Large raised reservoirs

We also have public register information for the [register of large raised reservoirs](#).

Viewing public registers in Environment Agency

offices

The Environment Agency holds public register information in its local offices, either electronically or hardcopy. You can contact them using the Customer Contact Centre general enquiries details if you can't access the information you need online.

They will confirm if the information you want is available and where you can visit to access it. They can also advise if any information can be sent to you.

[Notice: Blaydon Quarry Landfill, Newcastle upon Tyne](#)

Updated: Information updated 19 October 2018

This explains how the Environment Agency is working with Octagon Green Solutions Ltd, operators of Blaydon Quarry landfill, to reduce odour coming from the waste site. Also included is a list of which organisation is responsible for regulating the various issues which could arise during landfill site operations.

[Collection: Technical guidance for regulated industry sectors: environmental permitting](#)

Updated: We have withdrawn the technical guidance note for combustion activities. We have added a link to the BREF technical guidance for large combustion plant.

Changes to EPR guidance

The Environment Agency is currently updating EPR guidance to meet Smarter guidance and Government digital service requirements. Some of the generic guidance documents referred to in these technical guides have been withdrawn and replaced with new versions.

These sector technical guides are still current and how the Environment Agency regulates you and your legal requirements have not changed.

Changes to generic guidance documents are as follows:

- the generic How to comply with your environmental permit has been withdrawn and replaced with new guides about [developing a management system](#) and [controlling and monitoring emissions](#)
- H1 risk assessment overview guidance and related annexes have been withdrawn and replaced with a [new risk assessment overview guide](#) with supporting specialist risk assessment guides

You need to read these generic guides in addition to your sector technical guidance.

Paper, pulp and cardboard manufacturing

See the [BREF technical guidance for paper, pulp and cardboard manufacturing](#).

Combustion activities

See the [BREF technical guidance for large combustion plants](#).

[Collection: Monitoring emissions to air, land and water \(MCERTS\)](#)

Updated: New document 'M5 Monitoring of stack gas emissions from medium combustion plants and specified generators' added under the list of monitoring guides.

If your company needs to comply with these laws you will need a permission from us to operate. This permission usually comes in the form of a permit, which usually requires you to monitor your emissions.

Businesses either monitor their emissions all the time, known as continuous monitoring, or at times defined in their permit, known as spot tests or periodic monitoring. In both cases they must meet our quality requirements.

MCERTS is the Environment Agency's Monitoring Certification Scheme. It provides the framework for businesses to meet our quality requirements. If you comply with MCERTS we can have confidence in the monitoring of emissions to the environment.

MCERTS is used to approve instruments, people and laboratories.

[Find an MCERTS accredited laboratory](#)

[Find a list of MCERTS certified instruments and products](#)

[Download the Method Implementation Documents \(MIDs\) for stack emission monitoring](#)

[Guidance: MCERTS: performance standards and test procedures for continuous water monitoring equipment – part 3 water flowmeters](#)

Updated: Updated to improve clarity, facilitate new technologies and instantaneous flow measurement.

The Environment Agency set up its Monitoring Certification Scheme (MCERTS) to provide a framework of standards you can use to monitor things that affect the environment.
