

News story: Exmouth residents invited to tidal defence scheme drop-in event

Exmouth residents will have a chance to learn more about the benefits of the Environment Agency's £12 million tidal defence scheme at a drop-in event next week.

The event is being held on Wednesday 5 September at Ocean on Queens Drive, EX8 2AY between 11am and 8pm.

Rob Butler, project manager for the Environment Agency, said:

We have listened to feedback from the consultation events held in 2015 and 2016. We have designed a scheme that reduces tidal flood risk for many in Exmouth from a 4% chance to 0.5% chance in any given year.

This public exhibition is a great opportunity to come and see the plans we have developed and discuss them with the project team.

The Environment Agency is working in partnership with East Devon District Council to deliver this important scheme.

Councillor Tom Wright, East Devon's portfolio holder for the environment, said:

East Devon District Council is totally committed to working with our partners, the Environment Agency and Devon County Council, to ensure the future flood defences for Exmouth.

This is demonstrated in the urgent works we will be starting next month to reinforce the sea wall near Mamhead slipway. I urge all Exmouth residents to visit the exhibition.

The scheme is being designed and will be built by civil engineering contractor Team Van Oord. It will include:

- Flood embankments and walls between the Withycombe Brook and Imperial recreation ground.
- Raised defences between the Imperial recreation ground and Camperdown Terrace.
- Strengthening the existing seawall, improving drainage for water to drain back out to sea, flood gates and new set-back defences along the landward side of the Esplanade.

Following the public exhibition a planning application will be submitted to

East Devon District Council, the local planning authority, in late September. If permission is granted construction will begin early in 2019 and should be complete by 2021.

Press release: PLANS HAVE BEEN PUT FORWARD FOR HULL'S £42M TIDAL FLOOD SCHEME

Proposals for a multi-million scheme to protect thousands of properties from flooding from the Humber has been put forward to Hull's planning chiefs.

Planning permission is being sought for a £42 million Humber Hull Frontage Improvement Scheme to improve a 7-8 kilometre stretch of tidal flood defences in the Humber Estuary.

Led by the Environment Agency, the scheme has been designed to better protect 113,000 homes and businesses that are at risk from tidal flooding.

If the scheme gets planning approval, work will start at the end of the year and will be completed by the end of 2020.

Nine sites have been identified as part of the scheme including St Andrew's Quay, Albert Dock and Victoria Dock Village for improved defences.

Contractor BMM JV – a joint venture between BAM Nuttall and Mott MacDonald – are set to deliver the project which will help improve flood risk along the city's 19 kilometre waterfront.

[Residents can view the detailed plans by visiting Hull City Council's website:](#)

If you have any questions about the scheme please email:
humberhullfrontage@environment-agency.gov.uk

[More information is available on our dedicated web pages:](#)

In the past 65 years, there have been three major tidal events in Hull, the last was in December 2013 when 264 properties were flooded due to the overtopping of the existing defences. During high tides, water levels have the potential to rise to around 1 – 3m above some parts of the city.

Over the last few years, the Environment Agency has reviewed the existing Humber flood defences from Fleet Drain to the west of the city, through Hull, to Lord's Clough in the east. This work has identified the nine sites where work is now being proposed.

Helen Tattersdale, project manager at the Environment Agency, said:

“It is vital for Hull to have improved defences to protect against the potential devastating tidal flooding from the Humber Estuary.

“This investment has enabled us to assess a significant length of the current flood defence walls and embankments that run along the Hull frontage to come up with a scheme that will better protect the city both now and in the future taking into account climate change.”

“Over the past few months, we have been gathering feedback on aspects of the design from local residents and landowners, and other interested organisations including Natural England, the Marine Management Organisation (MMO) and Hull City Council which have been taken into account in our proposals.”

These improvements in Hull are supported by a further four kilometres (2.5 mile) of new and raised tidal defences on either side of the city in the East Riding of Yorkshire, at Hessle and Paull, delivered by East Riding of Yorkshire Council in partnership with the Environment Agency.

The Humber Hull Frontage Improvement Scheme is one of a number of tidal flood alleviation projects that form part of the Humber Flood Risk Management Strategy. The Environment Agency and local partners are now in the process of developing an advanced approach to managing flooding in tidal areas by the River Humber for the next 100 years.

It will be a long-term investment that will contribute to securing the viability of Hull and the wider Humber region, ensuring it retains its place as the eastern gateway to the UK economy.

This long-term investment will contribute to securing the viability of Hull and the wider Humber region, ensuring it retains its place as the eastern gateway to the UK economy.

Press release: Three fined for illegal fishing in the North East

Three people from Teesside have been fined a total of almost £1,500 after Environment Agency officers on Bank Holiday boat patrol with Cleveland Police caught them fishing illegally.

Maria Blyth, 30, and Adam Wakefield, 33, of Newtown Avenue in Stockton, were both fined a total of £270 and ordered to pay costs of £127.47 and a victim surcharge of £30 for fishing without a licence, fishing during the coarse fishing close season, and using bait prohibited during the close season.

In a separate case Thomas Stocker, 25, of Laurel Road in Stockton, was fined £440 and ordered to pay costs of £127.47 and a victim surcharge of £30 for fishing during the coarse fishing close season, and using bait prohibited during the close season.

Their cases were proved in their absence at Hull Magistrates' Court on 9 August.

On Bank Holiday weekend, Saturday 5 May, Environment Agency Fisheries Enforcement Officers were on boat patrol with Cleveland Police on the River Tees, upstream of the Tees Barrage, when they saw Blyth and Wakefield fishing at Bowesfield.

They saw Stocker fishing separately on the same stretch of river.

The fishing close season prevents fishing for coarse fish for 3 months to give the fish a chance to breed. It runs from 15 March to 15 June inclusive.

Regular partnership work

David Shears, from the Environment Agency's Fisheries Enforcement Team in the North East, said:

These boat patrols are part of the regular partnership work we do with the police to combat both rural and urban fisheries and other environmental crime.

Combining forces in this way allows us to target crime effectively and efficiently in locations where land-based patrols don't allow for easy access.

The majority of anglers, who fish legally, rightly demand that we take action to catch offenders. This is another example of how working with our partners results in successful court action.

The Environment Agency urges people to report illegal fishing as quickly as possible by calling the incident hotline on 0800 80 70 60.

Anyone who wants to go fishing needs to buy a fishing licence. A full annual licence costs from just £30 (short term and some concessionary licences are also available) and are [available online](#)

Press release: £600 fine for man found fishing without a licence near Doncaster

A 28-year old man from Rotherham, has been successfully prosecuted after being found guilty of fishing without a licence and providing false details to an officer in April 2018.

The case was brought to Hull & Holderness Magistrates Court by the Environment Agency on 9 August 2018, where Simon Carr, of Pear Tree Avenue, Bramley, Rotherham was found guilty and ordered to pay a total penalty of almost £600.

The penalty includes a fine of £440 plus costs of £127 and a victim surcharge of £30 after Simon Carr was found in breach of the Salmon and Freshwater Fisheries Act (1975) on 29 April 2018 at Banks End Fisheries in Blaxton, Westwoodside, near Doncaster.

Following the verdict, James Anderson, Fisheries Enforcement Officer for the Environment Agency said:

The case acts as a reminder to anglers of the importance of having a fishing licence. We hope it will also provide a deterrent to any angler who is thinking of fishing without a licence or providing false details to an officer. Although the angler initially gave us false details, we were quickly able to trace him through a check of his car registration. The case also shows anglers how seriously the courts take these offences.

All of the money raised from fishing licence sales is used to protect and improve fish stocks and fisheries, benefitting anglers and, for those caught cheating the system, we will always prosecute.

Every year across the country, thousands of anglers are prosecuted for not having a fishing licence. As well as cheating other anglers, fishing illegally can carry a hefty penalty. Getting caught without a licence could land a fine of up to £2,500.

Any angler aged 13 or over, fishing on a river, canal or still water needs a licence. A 1-day licence costs from just £6 and an annual licence costs from just £30 (concessions available). Licences are available from [GOV.UK](https://www.gov.uk) or by calling the Environment Agency on 0344 800 5386 between 8am and 6pm, Monday to Friday.

Anyone with information about illegal fishing activities can contact the Environment Agency Incident Hotline on 0800 80 70 60 or anonymously to Crimestoppers on 0800 555 111.
