

[Press release: North east man sentenced for waste fire](#)

A Cleveland farmer has been ordered to pay £4,899.44 after illegally storing and setting fire to controlled waste on his land.

The blaze, which was filmed by a National Police Air Service (NPAS) helicopter crew, took place at Holdensfield Farm, Yarm, in December 2016.

Charles Roderick Pickering, aged 71, of Holdensfield Farm, was charged with two waste offences when he appeared before Teesside Magistrates' Court on Friday, 10 November.

He admitted both allegations brought by the Environment Agency and was handed a £3,000 fine with £1,729.44 costs and £170 victim surcharge.

The court heard how the NPAS helicopter crew observed the fire, which was giving off a large plume of black smoke. Footage shows the fire was unattended and included materials such as uPVC door and window frames, wood, wheelie bins, a fridge and shower trays over an area of 50 metres square.

The fire was 200m away from a large housing estate to the north, 200m from HMP Kirklevington Grange to the west, 200m from two busy A roads servicing Yarm and immediately adjacent to a golf driving range.

Burned waste

When Environment Agency Officers attended the site on 19 December 2016 they found the burned and partially burned waste also included televisions, carpet, mattresses, kitchen units and garden waste. There was also an area of unburnt waste consisting of various packaging materials, paint tins and wooden pallets.

Pickering explained that he had allowed a man, whom he only knew by first name, to bring on some of the waste at no charge, with the rest being from his own farm. He admitted he had started the fire, stating he had done it when he considered the wind conditions suitable.

On 26 January 2017, Pickering was interviewed under caution. He produced an invoice and waste transfer notes showing that some of the burnt materials had been removed from the farm.

Mr Brown, of Hewitts Solicitor's mitigating on Mr Pickering's behalf, said Mr Pickering accepted responsibility for his wrong doing and had only burnt waste when the wind blew away from local housing and prison. He had now removed the waste at his expense.

Ignorance is 'no excuse'

Speaking after the court case, Environment Agency spokesperson Rachael

Caldwell said:

Ignorance is not an excuse for flouting environmental laws. Not only did Pickering unlawfully accept controlled waste onto his farm, he put the health of the local community and environment in danger by setting fire to it, producing a flume of smoke and fumes.

This case demonstrates the need for everyone to take their environmental responsibilities seriously. Failure to do so can have an immediate impact on people around you and pollute the environment for future generations.

Press release: Thousands of fish released into rivers

The Environment Agency has released 8,000 young fish to give fish stocks a boost in north east rivers.

The chub and dace were released on Thursday, 9 November into the River Tees at Low Coniscliffe and River Wear at Maiden Castle.

It's part of the Environment Agency's ongoing plan to develop and restore rivers in the region, targeting those which have been affected by pollution or where barriers affect fish passage.

Fisheries experts will release a total of 30,000 fish over the next two weeks in rivers and Stillwater fisheries in the north east. As well as the Tees and Wear, fish will be released into the Skerne near Darlington and the Team at Gateshead.

The fish – chub, dace, roach, bream, tench, rudd and crucian carp – were all reared at the Environment Agency's fish farm near Calverton, Nottinghamshire, using funding from rod licence sales.

Commitment to anglers

Alice Fitch, Fisheries Team leader for the Environment Agency in the north east, said: “We are pleased that we can provide these fish for stocking as part of our commitment to rod licence paying anglers. Restoration and the creation of new fisheries for all people to enjoy is a very important aspect of our work.”

The Environment Agency releases fish into our waterways annually. Fisheries officers target fish stocking activity using data from national fish surveys to identify where there are problems with poor breeding and survival. Releasing fish helps the process of natural recovery in waters which have been impacted by pollution or suffered poor water quality.

Alice added: “Restocking is one of many things we do together with our partners to develop fisheries, including reducing the effects of pollution, improving habitat and removing barriers to fish migration.”

Fisheries officer Paul Frear releases dace into the River Wear.

Improved water quality

Many of our industrialised rivers have improved dramatically in water quality in the last 30 years and targeted and appropriate restocking has helped the restoration of natural fish stocks and viable fisheries.

Angling is a great way for everyone to keep healthy and enjoy the natural environment. All rod licence income is used to find work to protect and improve fish stocks and fisheries.

Anyone who wants to go fishing needs to buy a rod licence. A full annual licence costs £30 (short term and some concessionary licences are also available) and are available [online](#)

[**Press release: £2 million flood scheme**](#)

for Much Wenlock

The scheme has seen the construction of 2 ponds which catch and store water that could otherwise flood properties, businesses and roads in the town. One pond is on the Sytche Brook to the north west of the town and the other is on the Shylte Brook to the south west.

The ponds, which will usually be empty, will fill during times of heavy rain. The collected water will then be released in a controlled manner so that flood risk downstream is reduced. The ponds, which are now fully operational, will drain down sufficiently quickly so that repeat rainfall events can be stored in a similar manner.

The scheme also includes the restoration of Westwood Quarry on Stretton Road.

The flood scheme was supported by the Environment Agency and funded through Flood Defence Grant in Aid by the Severn and Wye Regional Flood and Coastal Committee, local developer contributions and Shropshire Council. Work was carried out by the contractor Griffiths.

Dave Edwards, Senior Adviser at the Environment Agency, said:

The Much Wenlock flood alleviation scheme is a fantastic example of what can be achieved through partnership working. Much Wenlock has a long history of flooding so it's great to see the finished project protecting properties, businesses and roads in the town. We'll continue to work closely with both the council and the community in the future.

Steve Davenport, Shropshire Council's Cabinet member for highways and transport, said:

I'm delighted that work on this important scheme has now been completed, and that dozens of homes and businesses in Much Wenlock are now at far less risk from flooding than they have been in the past.

Between 2015 to 2021, Government is investing £2.5 billion in flood and coastal erosion risk management projects which will reduce the risk of flooding from rivers, the sea, groundwater and surface water for at least 300,000 homes.

Press release: Spot check crackdown on waste carriers in Enfield

Last week the Environment Agency took part in a multi-agency day with the Metropolitan Police Commercial Vehicle Unit, DVSA and HMRC Road Fuel Testing Unit in a bid to reduce and disrupt waste crime.

During the day of action, numerous commercial vehicles were checked by each agency including nine carrying controlled waste. Environment Agency officers checked that these operators had a permit to carry waste, had the correct duty of care paperwork and were describing the waste they were carrying correctly and weren't misdescribing it. Officers also checked whether waste was being transported to authorised and legitimate sites where it would be handled correctly.

Senior Environmental Crime Officer Julia Leigh said:

Multi-agency days of action are a valuable tool in preventing and disrupting waste crime. We want to make it very clear to people that everyone, including households, have a duty of care to ensure their waste is managed and disposed of correctly by the people they give it to. If you use illegal waste carriers to take your rubbish, you risk being fined up to £5,000.

Gareth Llewellyn, DVSA Chief Executive, said:

DVSA is committed to protecting you from unsafe drivers and vehicles. By combining our enforcement powers and intelligence with that of the Environment Agency, we're effectively targeting waste operators breaking the rules and putting themselves and other road users at risk. We won't hesitate to issue fines, or take vehicles off our roads, if we find waste carriers operating in an unsafe manner.

Waste being transported with no authorisations is likely to end up at illegal waste sites. Such sites store waste in vast quantities and for long periods of time posing significant risks to health and the environment, like pest infestations and fires, which could lead to water and land contamination plus air pollution from smoke. Illegal waste sites are often the cause of odour complaints too.

Julia Leigh added:

The Environment Agency wants to make sure businesses carrying waste have the proper authorisations to allow them to transport and

transfer waste: a waste carrier's registration from the Environment Agency and waste transfer note from the waste producer.

People who manage waste illegally cost the taxpayer millions every year in clean-up costs. They undercut legitimate business, pose a direct threat to sustainable growth in the waste management sector, take valuable resource from the public sector, and private land owners can be left with bills running into hundreds of thousands of pounds in clean-up costs. Our enforcement days make sure that the right waste goes to the right place □to stop unpermitted businesses undermining legitimate businesses and help create a level playing field.

All media enquiries, please call 0800 141 2743. Or email us at southeastpressofficel@environment-agency.gov.uk.

Further information

For information on how to apply as a waster carrier, broker or dealer, visit: www.gov.uk/waste-carrier-or-broker-registration.

People or businesses who transport, buy, sell or dispose of waste, or arrange for someone else to do so, must be registered. To check if someone is registered, visit: environment.data.gov.uk/public-register/view/search-waste-carriers-brokers.

To apply for an environmental permit please complete the appropriate form: www.gov.uk/topic/environmental-management/environmental-permits.

[Press release: Nottingham man arrested in connection with Walesby Fire](#)

A 41-year-old man was today (Wednesday Nov 8) arrested for questioning in relation to a fire which burned for over two weeks on a farm near Walesby in north Nottinghamshire last September.

He was arrested in a joint operation involving officers from the Environment Agency and Nottinghamshire Police.

He is being questioned in connection to a fire at Oakfield Farm, in Forest Lane, Walesby, which contained dumped illegal waste.

No permit existed for waste to be stored on the farm.

The man from the Sneinton area of Nottingham was also answering questions

about two other enquiries following the discovery of illegal waste at a site on Hathernware Industrial Estate in Loughborough and a farm in Leicestershire.

When officers entered the property in Sneinton they discovered around 40 suspected cannabis plants. The man is also being questioned over this matter.

Peter Haslock, Area Enforcement Team Leader for the East Midlands, said:

The arrest was made as part of a joint investigation involving enforcement officers from the Environment Agency and colleagues from Nottinghamshire Police.

We know the Walesby site did not have a permit for waste activity and we believe the waste was involved in the fire.

These are extremely serious cases and the Environment Agency is determined to bring the culprits to justice.

We are working closely with partners to share intelligence on illegal waste activity. And we're encouraging property and land owners to be vigilant.

Anyone who sees waste crime taking place is advised not to approach as these people can be dangerous.

Report it by calling our incident hotline on 0800 80 70 60 or anonymously to Crimestoppers on 0800 555 111.

Advice to land and property owners:

- Check any empty land and property regularly and make sure it is secure.
- Carry out rigorous checks on prospective and new tenants. Land and property owners have a responsibility to ensure anyone leasing their land/property complies with regulations. They may be committing an offence by allowing waste to be stored on land or property without the relevant permissions and could leave them liable to prosecution
- Be vigilant and report any unusual behaviour.
