

Press release: River transfer project gives local communities more say

A project designed to give local organisations and communities more say over the management of local watercourses has entered a new phase with the launch of public drop-ins in four pilot areas throughout October 2017.

The project is exploring the potential to re-designate several sections of selected 'Main Rivers' as 'Ordinary Watercourses,' (a process known as 'de-maining') where – in agreement with the Environment Agency – partners such as Internal Drainage Boards (IDBs) or Lead Local Flood Authorities (LLFAs) are keen to take on the lead role of local watercourses.

The project is piloting these changes in 5 locations. 4 of these locations are now approaching the consultation stage of the process and drop-in events will be held in:

- areas of Norfolk and Suffolk
- Stour Marshes in Kent,
- The Isle of Axholme in the East Midlands
- South Forty Foot Catchment in Lincolnshire

The final pilot at Wormbrook and Allensmore Brook in the West Midlands will be running to a different timeline.

The project aims to bring significant benefits to local communities, allowing those who know the layout of their land to take control of their local watercourses, and could help pave the way for further de-maining opportunities throughout England.

For the Environment Agency, the project will also ensure resources are prioritised where the greatest impact on reducing flood risk can be achieved.

Rachael Hill, Flood and Coastal Risk Manager for the Environment Agency, said:

We are working with local organisations to strengthen local decision-making. Internal Drainage Boards and Lead Local Flood Authorities are very much on the ground in communities so giving them responsibility over their own watercourses is a win-win situation that will ensure that the right people are managing the right watercourses in the right places.

We welcome the launch of the community drop-in sessions and we look forward to working together on this project to benefit people and the environment.

Innes Thomson, Chief Executive of the Association of Drainage Authorities

(ADA), added:

This is an unmissable opportunity for local communities to have their say on how they would like to see their local watercourses managed in the best way to make use of the funds available, whilst improving the quality of those watercourses, the environment and community wellbeing associated with healthy, maintained rivers and streams.

The drop-in sessions are an ideal way to find out more about the plans, help allay possible concerns and, very importantly, to provide support for these trials so please do try and find time to come to one of them.

Gaining local support for the transfer of watercourses through engagement and consultation is essential for the success of the project. The public drop-ins will be an opportunity for local communities and interested parties to ask questions and influence the proposals.

This will be followed by a formal consultation on GOV.UK currently scheduled for December 2017 which will seek further views on the proposals. If there are no objections, changes to the watercourse will take place in July 2018.

Drop-in sessions:

East Midlands:

Date	Time	Location
26 October	2pm-5pm	Haxey Chapel- Stephen Jones Community Hall, DN9 2LA
31 October	10am-1pm	Coronation Hall, DN9 1RL

Lincolnshire:

Date	Time	Location
9 October	1pm-6pm	Rippingale Village Hall, PE10 0TA
11 October	1pm-6pm	Billingborough Village Hall, NG34 0QH
18 October	1pm-6pm	Helpringham Memorial Hall, NG34 0RJ

Norfolk and Suffolk:

Date	Time	Location
16 October	2pm-7pm	Kettlestone Village Hall, NR21 0AU
19 October	2pm-7pm	Dereham Memorial Hall Meeting Room, NR19 1AD
24 October	2pm-7pm	Halesworth Methodist Church, IP19 8LR
26 October	2pm-7pm	Wymondham Central Hall, NR18 0QB
27 October	3pm-7pm	Hunstanton Community Centre, PE36 5BW
31 October	2pm-7pm	Sea Palling and Waxham Village Hall, NR12 0US

Stour Marshes:

Date	Time	Location
4 October	2pm-7pm	Minster Village Hall, CT12 4BU
19 October	2pm-7pm	Little Chart Village Hall, TN27 0QB
25 October	2pm-7pm	Great Mongeham Parish Hall, CT14 9LL

Press release: Environment Agency approves Third Energy's hydraulic fracture plan

The Environment Agency has approved (Tuesday 10 October) Third Energy's hydraulic fracture plan (frack plan) for its well site at Kirby Misperton in North Yorkshire.

An approved frack plan is required before the company starts fracking under the conditions of the operator's environmental permit, which was issued by the Environment Agency in April 2016 after extensive public consultation.

The Environment Agency is confident, following a thorough assessment of the frack plan, that Third Energy has demonstrated it has the right procedures in place to control and monitor the fracturing process. The plan will be available to view on the Environment Agency's Citizen Space website.

A spokesperson for the Environment Agency said:

We are satisfied with Third Energy's arrangements for monitoring during and after hydraulic fracturing. The Environment Agency is committed to ensuring that shale gas operations meet the highest environmental standards and can only go ahead if they are safe for people and the environment.

Our environmental permits set out the legal conditions needed to protect groundwater, surface water and air quality and to ensure the safe storage, management and disposal of waste. Our staff will continue to carry out regular on-site checks and audits to ensure that the company is meeting the high standards we require.

The fracture plan and other operational documents relating to Third Energy's operation can be found on the Environment Agency's [Citizen Space website](#).

Press release: Stewartby public consultation deadline extended

The Environment Agency has extended the deadline for its public consultation on the draft environmental permit for the proposed energy from waste facility at Rookery Pit, Stewartby, Bedfordshire, which would be operated by Covanta Energy Limited.

The public consultation period has been extended by 2 weeks and will now run from 11 September to 7 November 2017 to allow people more time to read all the available information.

A permit will only be issued by the Environment Agency if it is satisfied that the facility will be designed, built, operated and maintained in such a way that the requirements of the relevant EU Directives are met and that human health and the environment are protected.

This will be decided following consultation with the relevant local councils and their health departments, the Food Standards Agency, Public Health England, the Health and Safety Executive and other identified statutory consultees.

People wanting to provide comments to be considered during the determination by the Environment Agency should send them to: psc@environment-agency.gov.uk or write to: Environment Agency, Permitting Support Centre, Land Team, Quadrant 2, 99 Parkway Avenue, Sheffield, S9 4WF.

Please quote permit application number EPR/WP3234DY/A001.

To provide comments online and to view the documents that form part of this consultation, please follow this [link](#)

Interested parties can also make an appointment to view a copy of the draft permit and draft decision document at the local Environment Agency office, located at: Bromholme Lane, Brampton, Huntingdon, Cambridgeshire, PE28 4NE.

Press release: Vital renovation for sea wall at Walton on the Naze

The sea wall at Walton on the Naze helps to protect a wetland site of designated international importance under the Ramsar Convention.

The repair work will ensure the wall remains an effective flood defence for years to come and prevent any further deterioration.

Starting later this month, a section of the tidal defence embankment will be refurbished over a 3 month period.

The project will see the renovation of a 1.7 kilometre stretch of the embankment, running north up the coast from Foundry Lane.

The work is being carried out by civil engineering contractors Breheny and will take place on the crest and seaward sides of the embankment.

Work is due to begin in the week commencing 9 October 2017 and normal working hours will be from 7:30am to 5pm, Monday to Friday.

Kerry Bentley, Asset Performance Officer for the Environment Agency, said:

This is very important work and will ensure the sea wall can continue to provide an effective level of protection in the area for years to come.

The damaged sections of existing sea wall will be removed and new sections will be added.

The old blocks will be placed at the toe of the sea wall as habitat and to help reduce wave impact.

In order to ensure the safe delivery of these works we will need to redirect short sections of the footpath to the rear of the wall.

Press release: 'Right Waste, Right Place' spot-checks on Thames Valley waste firms

Updated: Updated summary.

A number of businesses across Berkshire and Buckinghamshire are on notice to comply with the law on waste disposal, after a series of unannounced checks by the Environment Agency on Tuesday 3 October.

Officers visited more than 100 sites and firms across the Thames Valley, and will be following-up on 10 illegal waste sites found during the day. The owners may face prosecution. Other premises were given advice and guidance to help them meet their legal requirements.

Firms are required by law to manage waste without a threat to the environment, such as not releasing anything other than waste water into the drainage network. The surprise inspections covered the removal of hazardous items, like chemicals and car batteries. Thames Water assisted the Environment Agency on pollution checks. Companies were also checked for having the correct environmental permit for their business.

Environment Agency staff were also on hand at DIY store Wickes in Slough, to offer free waste-handling advice to hauliers and homeowners, in order to reduce fly-tipping.

Mark Tucker, Installations Team Leader for the Environment Agency in the Thames Valley, said:

The Environment Agency works with business to make sure waste ends up in the right place, and may take more formal action where we believe a serious crime has been committed through illegal waste disposal.

Anyone who produces, carries, keeps, treats or disposes of waste has a duty of care to make sure it is managed correctly. The public can do their bit by only using a licenced waste carrier, or reporting any concerns on waste management to the Environment Agency on 0800 807060.

The 117 sites we inspected this week were under no illusion of their legal obligations on waste management. Mishandling waste, poorly-operated permitted sites and illegal waste activities can pose a threat to human health and the environment by contaminating land, polluting rivers and producing emissions from burning waste.

As well as breaking the law, illegal operations undermine the work done by legitimate firms.

Waste crime is a very serious issue for both local communities and the environment. The Environment Agency uses reports from industry and the public to build intelligence, and target those involved in organised environmental crime, and where their activities pose the greatest risk to the environment.

Handling of illegal waste can be reported anonymously to Crimestoppers, on 0800 555111. There are lots of signs that could suggest suspicious activity. These include:

- Out-of-hours activity at night, over weekends and during bank holidays
- Smoke caused by constant burning
- An increase in the number of lorries entering a site
- Waste going into a site but not coming out with increasing quantities of waste stockpiled on site
- Water pollution

The Environment Agency and local councils also investigate reports of fly-

tipping.
