

[Press release: Environment Agency chair to visit Derbyshire's BogFest 2017](#)

Emma Howard Boyd, Chair of the [Environment Agency](#), will be visiting Derbyshire on Friday 22 September to present at a conference as part of the three-day [BogFest 2017](#) event in Edale.

BogFest 2017, organised by the [Moors for the Future Partnership](#) and the [International Union for Conservation of Nature UK Peatland Programme](#), forms a conference programme for invited delegates alongside a range of activities and sessions for the public to celebrate the iconic moorland of the Peak District and South Pennines.

Emma Howard Boyd will be presenting at the conference along with the Environment Agency's East Midlands Area Manager, Louise Cresswell, and other Environment Agency officers. Emma will be presenting on the benefits and progress made in using natural flood risk management and also chair other sessions at the conference.

Emma Howard Boyd, Chair of the Environment Agency, said:

I am looking forward to visiting Derbyshire and attending the BogFest 2017 conference. The Environment Agency has been working with the Moors for the Future Partnership as a significant partner for over 10 years, and we have supported a range of research and delivery projects.

Whilst our involvement initially focussed on the biodiversity- and carbon-related benefits of the peatland restoration, it has increasingly focussed on the water quality and natural flood risk management benefits.

Through our ongoing involvement in the partnership, we are able to influence as to where resources are devoted in the moorland landscape. We benefit from the influence offered by working within the partnership to achieve this, and from the work of the programme team in securing significant resources from funding bids.

The partnership's strength lies in its relevance to people and wildlife across the Dark Peak and South Pennines. The region is one of the most visited areas of moorland in the world offering a range of ecosystem services to a vast local population.

The partnership also provides a great networking opportunity between landowners and policy-making bodies and allows us to

influence the various needs of research to supply evidence which supports the management of the moorland.

Chris Dean, Moors for the Future Partnership's Head of Programme Delivery, said:

We are delighted to welcome Emma Howard Boyd to BogFest – our first festival-style conference, celebrating the iconic uplands and brilliant blanket bogs across the UK.

The conference takes place in Edale, at the foot of the South Pennines, where blanket bog is slowly recovering from devastation caused by pollution dating back to the industrial revolution and damage from wildfires.

With the support of the Environment Agency, together we have restored much of the most severely damaged blanket bog, facilitated the regeneration of upland clough woodlands, and inspired the public to get involved in the UK's first upland citizen science initiative.

Thanks to the funding from the Environment Agency and our other partners and funders, our work has far-reaching benefits including natural flood risk management, water quality, biodiversity, carbon storage, and health and well-being.

Background

The Moors for the Future Partnership delivers its work through the [Peak District National Park Authority](#) as the lead and accountable body. It is supported through its partners including the Environment Agency, [Natural England](#), [National Trust](#), [RSPB](#), [Severn Trent Water](#), [United Utilities](#), [Yorkshire Water](#), [Pennine Prospects](#) and representatives of the moorland owner and farming community.

BogFest is financed by Moors for the Future Partnership's [MoorLIFE2020 project](#), a 5-year programme that aims to protect remaining active blanket bog in the South Pennines Special Area of Conservation. The project is delivered by the Peak District National Park Authority as the lead and accountable body. On-the-ground delivery of the project is being undertaken largely by the Moors for the Future Partnership staff team with works also undertaken by the National Trust High Peak and Marsden Moor Estate, the RSPB Dove Stone team and Pennine Prospects (the Associated Beneficiaries).

The Moors for the Future Partnership has been working since 2003 to protect the most degraded landscape in Europe. Using innovative conservation techniques it has transformed over 32sq km of black degraded peat in the Peak District National Park and South Pennines. A monitoring programme provides evidence of the effectiveness of these techniques and is backed up by

innovative communications that inspire people to care for these special places.

[Press release: Flood risk reduced and wildlife brimming over on the Ribble](#)

A new scheme that will improve flood protection, boost wildlife habitats and create 160 hectares of new saltmarsh, was opened today (Thursday 21st September).

The new reserve not only creates new saltmarsh habitat but strengthens sea defences. The £6 million scheme at Hesketh, in Lancashire, is a partnership project between the RSPB, Natural England and the Environment Agency.

The RSPB's Hesketh Out Marsh Reserve and Natural England's Ribble Estuary National Nature Reserve (NNR) are a real world demonstration of the newly-launched joint strategy for NNRs. The Environment Agency has breached the banks at Hesketh Out Marsh East. This important work has been made possible by:

- almost £2 million funding from Landfill Communities Fund monies from FCC Environment through [WREN](#)
- £3.7 million government funding to reduce flood risk

Environment Minister Thérèse Coffey said:

Hesketh is an inspiring project, creating fantastic new habitats for wildlife and providing increased flood protection for hundreds of people living around the Ribble Estuary.

This £6 million scheme shows how embracing new ideas and working with partners can create tremendous benefits for the environment.

Natural England's Chairman, Andrew Sells, said:

England's National Nature Reserves are the most special places for nature, which also help improve the wellbeing of people making more than 17 million visits every year. Uniting these two reserves on the Ribble will create wonderful new habitat, reduce the risk of flooding and enhance the area's appeal to wildlife.

It is also an extremely symbolic moment, demonstrating how conservation will work in the future. Bringing together a number of important organisations and the local community, with the aim of

providing a far greater home for nature, is at the heart of the new Joint NNR strategy. It will enable us all to deliver more public benefits, such as improved health and wellbeing, and allow wildlife to spill over and enrich the surrounding countryside.

On completion, the full RSPB Hesketh Out Marsh Reserve will include 340 hectares of saltmarsh, making it the largest site of its kind in the north of England. Natural England will designate the reserve as part of the existing Ribble Estuary NNR later in 2017. The RSPB and Natural England will then jointly manage both sites as effectively one large reserve. Ribble Estuary NNR is already England's third largest National Nature Reserve.

Robin Horner, RSPB Area Manager said:

We're delighted to be celebrating this partnership work and all that has been achieved through this project. These improved coastal defences, fronted by saltmarsh, deliver much needed local climate change adaptation and provide invaluable new wildlife habitat close to Britain's most important single river estuary for birds.

Work at Hesketh Outmarsh East has involved strengthening and raising the height of 2km of flood banks. This has reduced the flood risk to more than 140 properties and 300 hectares of prime farmland nearby. This is known as 'managed realignment', and is one of the largest schemes of its kind in the UK.

Emma Howard Boyd, Chair of the Environment Agency, said:

Hesketh is a win, win scenario – a fantastic scheme which not only works with nature to reduce flood risk but also brings benefits to the wider environment and local communities. Through partnership working we can achieve more and Hesketh proves that.

[Press release: Hefty fines for anglers fishing without a licence](#)

The Environment Agency is reminding anglers of the importance of having a rod licence after three men were handed hefty fines for fishing illegally in separate offences.

They were caught during targeted patrols by Environment Agency Fisheries Enforcement Officers.

- On 16 April this year, Adrian Faife, 59, of Gairloch Road, Camberwell, London, was found fishing for eels or freshwater fish at Aldin Fishing Lakes, Durham without a licence.
- On 30 April 2017, Sylwester Michneiwick, 37, of Roker Avenue, Sunderland, was caught trout fishing at Derwent Reservoir, Consett, without a license.
- On 1 May this year, Jordan Mark Aldworth, 22, of St Johns Walk, Escomb, Bishop Auckland, was found fishing for trout at Grassholme Reservoir, Middleton In Teesdale.

Each was fined a total of £611, ordered to pay costs of £127 and a victim surcharge of £44.

The offences were all proved in absence at County Durham and Darlington Magistrates' Court on 13 September.

The Environment Agency's Fisheries Technical Specialist for the North East, Kevin Summerson, said:

It is wrong for anglers to think they can avoid paying for a licence. Those that do are cheating their fellow anglers.

Environment Agency Fisheries Officers are out checking licences almost every day of the year at all times of day. It's just not worth it to fish without the appropriate licence. The most a coarse and trout licence costs is £45, which would cover an angler for one year from the date of purchase and, where conditions permit, allow the angler to fish with up to three rods.

With what it has cost these anglers in fines, costs and victim surcharge they could have fished legally for over 10 years.

All income from rod licence sales is used to fund Environment Agency work to protect and improve fish stocks and fisheries, including improving habitats for fish and facilities for anglers, tackling illegal fishing and working with partners to encourage people to give fishing a go.

Buying a rod licence is quick and easy – you can buy them online at the Post Office.

The Environment Agency urges anyone to report illegal fishing by calling 0800 80 70 60.

[Press release: No waste permit costs](#)

driver

Caught driving a tipper truck full of waste without being registered with the Environment Agency has today (Mon 18/9) cost Patrick Egan £965.

Egan of Grange Road, Grays was convicted in his absence by Basildon magistrates of driving the truck without being registered as a waste carrier nor being employed by a registered waste carrier.

The court fined him £660 and ordered that as well as the fine he should pay a victim surcharge of £66, Environment Agency costs of £85 and compensation of £154.

The tipper truck was stopped by police in Gumley Road, Grays in the course of an investigation into fly-tipping.

When the vehicle was stopped in January this year it was loaded with rubble, bricks and plasterboard.

Don't ignore advice

Egan told them the vehicle belonged to a friend called James whom he sometimes did favours for, such as driving lorries, and was paid £100 to drive it.

He said he did not check the load.

After the hearing an Environment Agency officer spokesperson said: "People driving tipper trucks such as Mr Egan drove have a responsibility to check the load and to be properly permitted by the Environment Agency. It is not good enough to ignore this advice as the court decision has shown today."

The cost of registering with the Environment Agency in 2017 is £154. The registration is valid for 3 years.

[Press release: Explore the wonders of the Witham in free Wyndham Park event](#)

Habitat improvements at Grantham's Wyndham Park are the stage for a day of free activities helping everyone enjoy the nature on their doorstep.

Environment and conservation experts will be on hand at the award-winning location on Sunday 24 September, offering games, competitions, crafts, wildlife spotting and more.

All activities have been designed to show how easy and fun it is to get closer to nature – and play a part in protecting it.

The event marks the official unveiling of improvements to Wyndham's Park's natural habitat, and a 100m-stretch of the River Witham that flows through it.

Enhancements include an area of stepped decking enabling safe access to a shallow part of the river and new wetland habitat to attract rare species.

All were funded using fishing licence money from the Environment Agency, which is re-invested into rivers, helping to improve facilities for anglers, tackle illegal fishing and encourage more people to take up the sport.

The event will offer a chance to explore the changes to the park's habitat, and discover how they benefit both visitors and wildlife.

Matt Parr, geomorphology technical specialist at the Environment Agency, said:

Few things beat the great outdoors but that doesn't mean you have to escape into the wilderness. Natural wonders can be found right in the heart of your town.

We'll be on hand to help you spot the opportunities, using the beauty of Wyndham Park – and our improvements to the river there – to show how easy and fun it is to get closer to nature.

Organisations taking part in the event include the Environment Agency, South Kesteven District Council, Lincolnshire Rivers Trust, Anglian Water and Rivercare.

It takes place from 12noon to 4.30pm on Sunday 24 September. The date coincides with World Rivers Day, a global celebration of rivers, their value to local communities and the importance of looking after them.
