

# Press release: Tesco hit with major £8million fine for pollution incident

Tesco Stores Ltd has been ordered to pay over £8million in fines and costs after pleading guilty to a pollution incident.

The incident, which occurred in July 2014, sparked a huge multi-agency operation involving the Environment Agency, Lancashire County Council, United Utilities, Lancashire Fire and Rescue Service and Lancashire Police.

It had a massive impact on the local community and environment with residents having to leave their homes due to petrol odours coming from the sewer network.

The Environment Agency's joint investigation with partners found that the incident resulted from Tesco's failure to address a known issue with part of the fuel delivery system and an inadequate alarm system and was compounded by poor emergency procedures.

Tesco were fined a total of £8million – £5million for the health and safety offence and £3million for the environmental offence.

Between Wednesday 2 July and Thursday 3 July 2014 approximately 23,500 litres of petrol escaped from a petrol filling tank at a petrol station in Haslingden operated by Tesco.

Petrol entered the sewerage system with the odours affecting residents up to 1km away causing people to seek medical attention with headaches and sickness. The odours remained in the homes for a number of days.

Some of the petrol also entered Langwood Brook and the River Irwell causing a significant environmental impact killing fish and other aquatic life.

Samples taken from the River Irwell detected oil up to three miles downstream. Over 40 dead fish, including brown trout, were found within 1.5 miles of where the pollution entered. Anglers reported dead fish in Bury, over six miles downstream.

About 23,500 litres of unleaded petrol leaked from the tank over a 29 hour period. Around 7,000 litres was later recovered at the site and the remainder escaped into the sewer system and watercourse.

Mark Easedale, an Environment Manager for the Environment Agency, said:

This pollution incident had a dramatically negative impact on the local community and the environment with Langwood Brook and the River Irwell severely affected. A week after the pollution incident an investigation by Environment Agency officers found fish populations in the River Irwell immediately downstream of Langwood

Brook were around 90% lower than those found upstream.

The sentencing today sends out a clear message to anyone whose recklessness causes serious pollution to the environment – we will be relentless in our investigations and take action wherever needed.

Our staff work 24/7 to protect people and wildlife from pollution incidents and we encourage people to report such incidents to the Environment Agency's Incident Hotline on 0800 80 70 60.

This was a joint prosecution with Lancashire County Council and Tesco Stores Ltd also pleaded guilty to an offence under the Health and Safety at Work Act.

County Councillor Albert Atkinson, deputy leader of Lancashire County Council with responsibility for Trading Standards, said:

This was a major leak of fuel in a relatively built-up area and close to a busy superstore. The potential consequences are only too obvious.

The fact that the leak was allowed to continue for more than 24 hours undoubtedly contributed to a risk of harm to people living and working nearby, as well as emergency services and other professionals attending the incident.

- Tesco Stores Ltd were fined a total of £8million at Preston Crown Court – £5million for the health and safety charge and £3million for the environmental offence. They were also ordered to pay Environment Agency costs of £35,434.30 and (approx.) £22,000 to Lancashire County Council.
  - Tesco Stores Ltd pleaded guilty to causing a water discharge activity not under and to the extent authorised by an Environmental Permit, contrary to Regulation 12(1)(b) and 38(1)(a) of the Environmental Permitting (England & Wales) Regulations 2010. A guilty plea was entered at an earlier hearing at Burnley Crown Court on 12 September 2016.
  - There was a further indictment led by Lancashire County Council: Contravention of Regulation 6(8) of the Dangerous Substances and Explosive Atmospheres Regulations (DSEAR) 2002 contrary to s.33(1)(c) of the Health and Safety at Work etc. Act 1974. A guilty plea was also entered for this charge.

# Press release: Cornwall waste disposer prosecuted for illegally storing asbestos

The owner of a Cornish waste disposal business has been ordered to pay almost £80,000 in fines and costs for illegally storing and treating waste including asbestos at a site near Penzance.

The site manager was also prosecuted and ordered to pay a total of £6,000 in fines and costs. The case was brought by the Environment Agency.

Leslie Allen ran a waste operation from a site in Perranuthnoe where waste from various commercial and domestic sources was illegally processed. The site was also used to store hazardous waste including asbestos. The storage and bulking of waste requires an Environment Agency permit.

Truro Crown Court heard how the defendant operated without a permit despite receiving advice and guidance from the Environment Agency and assuring officers he would apply for a permit. The business had traded for some 18 years.

An investigation was launched by the Environment Agency in 2014 after officers suspected Les Allen Waste Disposal Services was still operating illegally. The transfer of waste was often not recorded and when it was, the records were either inadequate or misleading.

Waste was recorded as being taken from a customer direct to an approved site when, in actual fact, it was transported to Perranuthnoe for sorting before being taken to various sites. The business benefitted financially from operating without an environmental permit.

During their investigation, Environment Agency officers recovered asbestos from a pile of waste at the site. It had not been bagged or stored in a secure container as is required by law.

Sentencing Allen and his site manager, Richard Shore, Judge Carr said the handling of asbestos was a 'great responsibility' and the defendants had exposed themselves and others to risk. He said poor record keeping meant we would never know what waste went through the site.

On 5 February 2016, the Environment Agency discovered Leslie Allen was continuing to run an illegal waste operation despite having been interviewed under caution and giving an assurance he would stop. The business was operating a crusher and swing shovel on land near Sunnyvale Farm, Rosudgeon, Penzance and treating mixed construction and demolition waste to raise a ground level without an Environment Agency authorisation.

Sophie Unsworth of the Environment Agency said:

Waste sites must operate within the law and always put human health and the environment above financial gain. This is especially important for sites receiving hazardous waste such as asbestos.

Despite being given repeated advice and guidance by the Environment Agency, the owner chose to continue to operate illegally, receiving, handling and storing waste, without a permit.

Leslie Allen was fined £40,000 for two offences under the Environmental Permitting (England and Wales) Regulations 2010 including, between 17 November 2014 and 6 November 2015 and 5 February 2016 operating a regulated facility, namely a waste operation at The Workshop, Perranuthnoe Lane, Perranuthnoe and on land adjacent to Sunnyvale Farm, Rosudgeon, Penzance without an environmental permit.

He was also ordered to pay £14,200 costs and £25,772 under the Proceeds of Crime Act. Allen was warned that failure to pay would result in a 9-month prison sentence.

The site manager, Richard Shore, was fined £4,000 for the same offences and ordered to pay £2,000 costs.

The sentencing hearing took place at Truro Crown Court on 10 April 2017.

The Environment Agency is currently running a [Right Waste Right Place campaign](#) aimed at small to medium sized businesses who need waste advice.

Notes to editor

- Waste crime can cause serious pollution to the environment, puts communities at risk and undermines local businesses. It's a serious issue, diverting as much as £1 billion a year from legitimate business and the Treasury.
  - Waste crime is an issue that we and the government take very seriously. The Environment Agency has enhanced powers – introduced in 2015 – to tackle illegal activity at waste sites.
  - The Environment Agency stopped nearly 1,000 illegal waste sites from operating in 2015/16.
  - 97% of waste management operators are well run and provide a much needed waste management service. But we take tough action against poor performing companies and those who commit waste crime.
  - If you see waste crime report it by calling our incident hotline on 0800 80 70 60 or anonymously to Crimestoppers on 0800 555 111.

# Press release: High fines for illegal fishing

On 13 April 2017, at Barkingside Magistrates court, Billy Cox was fined £300 for fishing without the required number of rod licences, with costs of £127 and a victim surcharge of £30 imposed after a prosecution by the Environment Agency.

Magistrates heard that on 8 September 2016, an Environment Agency enforcement officer found Billy Cox fishing with 3 rods and lines at White Hart Lakes, Dagenham. He was only able to produce one valid licence and further licence checks confirmed that he did not have a second licence to cover the use of his third rod. At the time of the incident a rod licence permitted the use of up to 2 rods and lines which was clearly stated in the terms and conditions supplied with the licence. He was reported for the offence of not being able to produce the required number of licences when challenged by the bailiff.

Billy Cox was convicted in his absence.

Darren Wakenell, of the Environment Agency, said:

The majority of anglers fish legally and purchase a fishing licence. We invest the money from fishing licences back into fisheries improvements, fish stocks and fishing, this is essential for the future of the sport.

The minority of anglers that fail to buy a fishing licence are cheating their fellow anglers and the future of the sport. In addition, fishing licence cheats risk a criminal conviction, a significant fine and could lose their fishing equipment.

During 2015-2016 the Environment Agency checked more than 62,000 fishing licences and prosecuted more than 1,900 anglers for rod and line offences resulting in fines and costs in excess of £500,000.

Anyone witnessing illegal fishing incidents in progress can report them directly to the Environment Agency hotline, 0800 80 70 60. Information on illegal fishing and environmental crime can also be reported anonymously to Crimestoppers on 0800 555 111.

You need a valid Environment Agency fishing licence if you are aged 12 or over and fish for salmon, trout, freshwater fish, smelt or eel in England.

Junior fishing licences (aged 12-16) are now free, but you must still get a [fishing licence online](#).

## [Press release: Arrests made following dawn raids](#)

Today (Thursday 20 April 2017), the Environment Agency and police carried out 5 dawn raids following an in-depth investigation into illegal dumping of waste. There were 2 people arrested pending further enquiries. A third person will also be helping Environment Agency officers with their enquiries.

Enforcement action took place at 5 separate addresses in Staffordshire, Herefordshire and Hertfordshire this morning following an investigation into illegal dumping of 20,000 – 25,000 tonnes of waste at 17 sites across the Midlands, North West and North East.

More than 25 Environment Agency investigators, supported by over 20 police officers from Staffordshire, West Mercia, Warwickshire and Hertfordshire Police forces were in action at suspects' homes and business addresses seeking evidence as part of Operation Cesium.

The investigation will now continue with the evidence seized today. This investigation is expected to continue for many more months.

Paul Clarke, lead investigator in the Environment Agency's National Investigation Team, said:

The Environment Agency takes waste crime seriously and we will persistently pursue those suspected of illegally dumping waste.

In this case we have 17 landowners and communities blighted by significant amounts of dumped waste. We've already seen some of these sites catch fire, causing significant impact on communities, the environment and our emergency services partners who have to tackle them.

Illegal waste activity of the likes we're investigating here diverts £1 billion from legitimate businesses and the treasury, and at the Environment Agency we do everything we can to bring those responsible to account.

This investigation has been ongoing since last summer and enquiries will continue to examine the evidence to determine the full extent of the suspected offences.

The Environment Agency takes waste crime extremely seriously. This is a live and complex investigation, anyone with further information should contact Crimestoppers on 0800 555 111.

---

## **Press release: More than 400 rod licences checked in Easter crackdown**

Environment Agency officers checked more than 400 rod licences in an Easter weekend crackdown on illegal fishing.

Officers patrolling North East river banks checked 421 anglers, reporting 29 offences.

Of these, 21 were for rod licence offences, 7 were byelaw and close season offences and one offence under the Theft Act.

It's currently the close season for coarse fishing, which means fishing for coarse fish on rivers and streams is not permitted. This is done to protect breeding fish, helping to safeguard stocks for the future.

Kevin Summerson, Fisheries Enforcement Technical Specialist at the Environment Agency, said:

It's encouraging that the vast majority of anglers abide by the law, but there are still too many that we find during patrols that are fishing illegally.

We take illegal fishing very seriously – it's not fair on other anglers and endangers the future of the sport.

Our work is intelligence led and we work closely with our partners at the police and Angling Trust to target known hot spots and where illegal fishing is reported to us.

We carry out enforcement work all year round and will be continuing throughout the coming weeks, including the upcoming Bank Holiday weekends.

We really want people to get outdoors and enjoy what is a fantastic sport, and the rod licence is great value for money for all the family.

I'd urge people to help us protect the health of our fisheries by reporting any suspected illegal activity to us.

All the money from rod licence sales goes back into maintaining the health of fisheries and waters, angling projects and much more.

Anyone caught fishing without a valid licence could be fined up to £2,500 and fishing during the close season attracts a fine of up to £50,000.

Coarse fishing is still allowed on most still waters and canals, depending on fishery owner agreement, though a valid fishing licence is still required. You can check which still waters and canals still have a close season in operation by checking the byelaws which apply in your area at <https://www.gov.uk/government/collections/local-fishing-byelaws>

Anyone who wants to go fishing needs to buy a fishing licence. A full annual licence costs £30 (short term and some concessionary licences are also available) and are available online at [www.gov.uk/get-a-fishing-licence](http://www.gov.uk/get-a-fishing-licence).

Environment Agency officers routinely carry out licence checks and anyone with information about illegal fishing activities is urged to report it via the Environment Agency's Incident Hotline on 0800 80 70 60 or anonymously to Crimestoppers on 0800 555 111.
