

Press release: Landowners warned after waste dumped illegally

Durham Police and the Environment Agency are warning landowners to be vigilant after a significant illegal waste site was discovered on private land in County Durham last week (10 February 2017).

More than 600 bales of general household waste were found dumped on the premises of a former foundry in Tow Law.

Officers from Durham Police and the Environment Agency attended the scene after they were alerted to the activities taking place at the site.

This is the latest in a recent spate of illegal waste dumping across the region. The Environment Agency currently has three ongoing investigations relating to eight sites where baled waste has been dumped over the last six months.

Environmental laws state that waste producers, brokers, road hauliers and landowners each have a responsibility to ensure waste is dealt with legally and correctly for the protection of the environment and communities. The Environment Agency will seek to take action against all parties responsible for this illegal activity.

Dave Edwardson, Enforcement Team Leader at the Environment Agency in the North East, said:

Landowners can be vulnerable. Waste dumped in vacant buildings or land may leave landowners with the responsibility and costs of disposing of the waste, which can be considerable.

We're determined to tackle waste crime such as this; waste that isn't managed properly can impact on communities, the environment and legitimate businesses and won't be tolerated.

I'd urge all landowners, farmers and property agents to be vigilant and report any concerns or anything suspicious to us straight away.

Waste producers and road hauliers must ensure they adhere to their Duty of Care when they are managing waste. They can contact the Environment Agency if they need any advice or information.

Anyone with information about those responsible for this or similar incidents is asked to contact the Environment Agency's 24-hour Incident Hotline on 0800 807060, or Crimestoppers anonymously on 0800 555 111.

Press release: Valentine's Day of action against illegal waste activity

Environment Agency enforcement officers, on the 14 February, paid unannounced visits to 14 sites across Oxfordshire, Buckinghamshire, Surrey, Hampshire and West Berkshire in a bid to stamp out waste crime and protect the environment from the threat of pollution.

Named Operation Arrow, officers targeted sites suspected of operating in the waste business without the required environmental permits, flouting the law and committing crime.

Waste that ends up at unregulated sites is often stockpiled in vast quantities and for long periods of time. The waste can pose a significant risks to the environment, blighting communities with smoke fumes and causing noise and odour complaints. Illegal waste operators also undermine the work of legitimate waste companies, creating an unfair playing field for business.

Helen Page, Enforcement Team Leader at the Environment Agency said:

We want to make sure the right waste goes to the right place – to protect the environment and local communities. Site visits on our days of action are just one of the ways we are tackling waste crime to help make sure this happens.

We are really pleased with what we achieved. Of the 14 sites visited, 5 were found to be operating illegally. The information we have gathered is helping us target our work at those involved in organised environmental crime and where their activities pose the greatest risk to the environment.

Everyone can do their bit to reduce waste crime by making sure that any waste for disposal is collected by a licensed waste carrier and taken to a properly permitted, legitimate waste site.

Press release: Rugeley Flood Risk Management Scheme well under way

The Environment Agency's Rugeley Flood Risk Management Scheme that began in December is progressing well. Preparations for the construction of the embankment have now started.

To make sure that the public stay safe while the work is being carried out, the Hagley playing fields will remain closed to the public until 2018, once the scheme has been completed.

During a flood, the embankment will hold water from the Rising Brook and help to reduce the risk of flooding for over 114 homes and 159 businesses. Other benefits of the £3.8 million scheme include improving habitat, restoring heritage features and reconnecting footpaths and improving accessibility. It also forms an integral part of Cannock Chase council's plans to regenerate parts of the town centre.

Environment Agency Project Manager Matt Griffin said:

We're working hard to get the scheme completed as soon as possible so we can minimise any disruption and inconvenience. However, keeping people and the community safe during the work remains our priority which means closing the playing fields is essential.

The works are a partnership with Staffordshire County Council, Cannock Chase District Council and Stoke-on-Trent and Staffordshire Local Enterprise Partnership.

Press release: Restoring fifty hectares of rare and threatened habitats in Doncaster to benefit all

Almost 50 hectares of nationally-important habitat is being restored in Doncaster as part of an Environment Agency-led project benefiting communities and wildlife.

The work across seven woodland areas, including two Sites of Special Scientific Interest (SSSI), will help improve water quality, reduce flood risk, and enhance natural habitats for protected species.

Beginning in September last year, the Inspiring Water Action in the Torne project is creating, restoring and improving up to 46.5 hectares of wet-woodland priority habitats – and involving local communities in doing so.

The 46.5 hectares represents 11 per cent of the Environment Agency's national target for habitat creation.

Measures include selectively thinning the woodland, re-wetting areas that have dried out, improving access for visitors, and sowing native plants that will help filter pollutants from the environment.

As well as providing for one of the nation's most threatened bird species – the Willow Tit – the restored wet-woodland will act as a natural aid to reducing flood risk by creating more room for water.

The estimated 4,000 cubic metres of extra storage space will help naturally interrupt and soak up the flow of rising waters, reducing the risk to around 1,000 nearby properties, as well as to agricultural land.

This will lessen the reliance on the Keadby Pumping Station, bringing down the carbon and financial costs of using it to artificially drain excess water from the River Torne into the River Trent.

David Newborough, Environment Agency catchment co-ordinator, said:

Our role is to create better places for people and wildlife. This project is a perfect example of how we can achieve that through simple measures that deliver many benefits.

By restoring wet woodland to a state that's closer to how nature intended, we're protecting vital habitat, providing for threatened species, creating spaces that everyone can enjoy, and reducing the risk of flooding, all in one go.

Communities across the area are involved in making the project a success, with volunteers and school children taking active roles.

Around 600 children and young people across seven schools, each linked with one of the woodland sites, are using the project to learn first-hand about flood risk, water quality and management, and ecology.

David continued:

Working with school children is one of the most exciting and rewarding aspects of this project.

They are directly involved in understanding and protecting our natural environment, which is essential for its future. And their enthusiasm for the difference they can make is great to see.

Some of the work is being carried out by volunteers, who are learning new skills in the management of woodland habitats. These skills will help them maintain the improvements into the future.

The £100,000 project, which includes work at Potteric Carr Nature Reserve SSSI, Holmes Carr Wood, Tickhill Low Common, Bog Wood, Bessacarr Bank, Sandall Beat Wood SSSI and Rossington Brick Pond, is expected to bring benefits valued at around £1m.

Inspiring Water Action in the Torne is a Torne Catchment Partnership project led by the Environment Agency and involving [Yorkshire Wildlife Trust](#), [Doncaster Metropolitan Borough Council](#), [Natural England](#) and local communities.

[Press release: Fishing cheats land big fines in court in Middlesex](#)

Anglers had penalties of over £450 each imposed at Uxbridge Magistrates Court on 6 February 2017 for fishing illegally, without an Environment Agency rod licence.

Adam Younie 26 of Haverhill, John Tibbs 46 of Romford, and Steve Sullivan 48 were caught fishing without a licence by Environment Agency fisheries enforcement officers at Thorney Weir lakes, West Drayton, Middlesex. Each were fined £300 (with £127 costs and £30 victim surcharge) when an Environment Agency annual licence at the time, cost just £27.

All anglers failed to appear in court. Environment Agency Fisheries Team Leader, Richard Tyner said:

We check licences across all fisheries in Hertfordshire and Essex, and work in partnership with fishery owners and the police to detect and deter fisheries crime. People who don't buy a licence are cheating other anglers and the future of the sport. The Environment Agency relies on the income from rod licence sales to continue the important work we do to protect fish stocks, improve fisheries and encourage more people to take up fishing.

If you are caught fishing without a rod licence you risk a criminal conviction and a fine up to £2,500. There is no excuse. Annual rod licences for trout and coarse fishing remain at £5 for 12 to 16 year olds, £18 for senior and disabled concessions and £27 for non-concessions. Children under 12 can fish for free. Licences are easy to buy from the Post Office website or by phone on 03448 005 386 prior to fishing. Anglers should always ensure

they have permission to fish at a fishery and check Environment Agency byelaws.

Last year, Environment Agency officers checked more than 62,000 licences and prosecuted more than 1,900 licence cheats. Between them, they were ordered to pay fines and costs in excess of £600,000. To help crack down on unlicensed fishing, the Environment Agency urges anyone to report illegal activity by calling 0800 80 70 60 or anonymously to Crimestoppers on 0800 555 111.

Money raised from rod licence sales is reinvested in the environment, including; a wide range of projects to improve facilities for anglers, protecting stocks from illegal fishing, fish restocking, invasive species eradication, and working with partners to encourage people to take-up fishing for the first time.
