Apply to buy nutrient mitigation credits from Natural England to offset nutrient pollution from housing development.

Guidance: Using the nutrient neutrality calculators

How to use the calculators to work out a nutrient budget for residential developments in nutrient neutrality catchments.

Guidance: SFI actions for integrated pest management

Find out about the SFI actions for integrated pest management, what land is eligible for each action, and what you need to do to get paid.

Press release: Environment Agency

exploring options to reduce Birmingham floods

The Bourn Flood Risk Management Scheme aims to minimise flooding from the River Bourn by creating flood storage areas to hold excess water during high rainfall.
