

# Press release: £1m culvert repair work to reduce flood risk set to begin

The £1million culvert repair project is due to start on Monday 23 July and is expected to take 13 weeks to complete.

Environment Agency contractors, JBA Bentley, will be on site to carry out the work in the Lancashire town to make Victoria Clough culvert structurally sound.

Culverts are structures which carry water underground. They were often built to allow development to take place around them such as roads, homes and businesses. Many people live and work near culverts and may not even know they are there.

A new culvert will be installed beneath the disused railway embankment to replace the existing one which has collapsed. The team will also re-line or replace a number of sections along the length of the culvert at locations under Victoria Road and the A56 Skipton Road.

A new and improved trash screen will also be fixed at the inlet of the culvert, to help reduce the risk of it becoming blocked with debris and making it easier and safer to clear when water levels are high.

During the period of work there will be disruption to traffic using the A56 and Victoria Road. There will need to be road closures on Valley Road and New Road with local diversions and temporary traffic lights put in place, and some parking restrictions on Victoria Road.

Paul Swales flood risk advisor at the Environment Agency said:

Earby has suffered devastating flooding over recent years, most notably the Boxing Day 2015 flood. We're pleased to be starting this repair work which will bring significant flood risk benefits to homes and businesses.

We understand that this traffic management could cause some inconvenience so we will do all we can to minimise this disruption as much as possible. We'd like to thank residents and businesses for their patience and understanding while we carry out this essential work to reduce flood risk.

Funding for the project comes from £813k of Grant in Aid and £200k of Yorkshire Local Levy.

Since the floods of Boxing Day 2015, the Environment Agency has worked in partnership with Pendle Borough Council, Lancashire County Council and Yorkshire Water to develop schemes to reduce flood risk in Earby.

## Options explored

The Environment Agency continues to explore other options to reduce flood risk from all sources in and around Earby. Over the next 12 months, the team will investigate the options in more detail, which include flood storage areas on Earby Beck, the New Cut and Victoria Clough and installing a flood defence wall at Boot Street.

The Environment Agency is looking for volunteer flood wardens to play a key part in keeping Earby prepared and informed before, during and after a flood. Anyone interested in becoming a flood warden can email [heather.cottrill@environment-agency.gov.uk](mailto:heather.cottrill@environment-agency.gov.uk) to find out more.

By signing up to the Environment Agency's free Flood Warning service residents and businesses can receive flood alerts and flood warnings for Earby Beck and/or Earby New Cut directly to their phone and emails, 24/7. Find out if you're at risk and [register for free flood warnings](#).

## **Notice: WV13 2QF, Scanmetals (UK) Limited: environmental permit issued**

The Environment Agency publish permits that they issue under the Industrial Emissions Directive (IED).

This decision includes the permit, decision document for:

- Operator name: Scanmetals (UK) Limited
  - Installation name: Scanmetals (UK) Limited
  - Permit number: EPR/QP3237YA/V002
- 

## **Press release: Environment Agency warns of illegal waste being dumped empty commercial units**

Empty industrial units across the country are being targeted by waste criminals to dispose of thousands of tonnes of illegal waste.

The growing trend sees criminals pose as legitimate tenants to rent properties used to store illegal waste. Once discovered, landlords, property managers and farmers are burdened with thousands of pounds in clear up costs and face possible criminal prosecution, fines and even custodial sentences for failure to operate without an environmental permit.

The waste, mainly made up of potentially hazardous materials, poses a serious pollution and fire risk and undermines legitimate business.

With hundreds of commercial properties across the country thought to be empty, the Environment Agency is calling for landlords to be extra vigilant when letting out their properties. The regulator is also calling on businesses, organisations and individuals to manage their waste responsibly to prevent it from getting into criminal hands in the first place.

During the period Dec 2016 – Nov 2017 the Environment Agency investigated the dumping of 18,244 bales of waste – each bale being approximately 1 ton. It's estimated that at a low end price of £70 per bale this would amount to £1,277,000 for correct disposal of the waste.

The Environment Agency reveals the top four land types which are most susceptible to illegal dumping. The land type descriptions key dump sites are:

- Farms 34%
- Industrial Unit 24%
- Abandoned factory 10%
- Derelict site 7%

Nicky Lawton, Deputy Director – National Enforcement Service, said:

Unsuspecting landlords and property managers are failing foul of

waste criminals and as a result are being made to pick up hefty bills to clear up the waste – often running into the hundreds of thousands of pounds.

Landlords can avoid this by carrying out checks to prospective tenants to ensure their sites will not be used as part of an illegal waste operation.

Waste crime, which costs the economy £604 million a year, is a serious problem that we're using all our available resources and powers to curb.

Landlords and property managers are urged to take the following steps to avoid being a victim of waste crime:

- Carry out rigorous checks on prospective new tenants.
- Check any empty land and property regularly and make sure it is secure.
- It is illegal to store waste on your land without the required permits. You may be committing an offence by allowing waste to be stored on your land or property without the relevant permissions and you could be liable to prosecution and the cost of removing the waste.
- Landlords should check before signing a contract that the contract complies with regulations. You can view whether a potential tenant holds the correct permit to carry out waste operations at [public register](#)
- The offer of payment to temporarily store waste is a scam, the waste will likely never be collected.
- Be vigilant and report any unusual behaviour. If you are suspicious of prospective tenants please contact us for more information and advice.
- If you are approached to store baled waste, even on a short term basis, refuse the material and call Crimestoppers anonymously on 0800 555 111.

The Environment Agency's Prevention & Disruption teams are working hard to address waste crime, exercising new regulatory powers to lock up and block access to illegal waste sites.

# Press release: Milestone for managing seas in South of England reached

The Government has now adopted England's South Marine Plan, which brings a new approach to managing the seas between Kent and Devon.

The new marine plan provides a policy framework which will be used to help inform decision-making on what activities take place in the marine environment and where how the marine environment is developed, protected and improved in the next 20 years. It will inform and guide decisions by regulators managing the development of industry in marine and coastal areas, while conserving and enhancing the environment and recognising leisure uses.

The marine plan, produced by the Marine Management Organisation (MMO) on behalf of the Department for Environment, Food and Rural Affairs, is the culmination of around 5 years of engagement with business, charities, representative organisations and individuals.

The plan will help business realise the economic benefits available from the Marine Plan area whilst ensuring the marine environment remains protected. Covering an area of approximately 1,700 kilometres of coastline and over 21,000 square kilometres of sea, the plan stretches from Felixstowe in Kent to the River Dart in Devon. This is a very dynamic marine area incorporating 9 world heritage sites and some of the busiest shipping channels in Europe.

The MMO is now working with Local Authorities in the area to ensure successful implementation of the new Plan.

Environment Minister Thérèse Coffey said:

The South Marine Plan is a significant milestone in our ambition to create healthy and biologically diverse seas and oceans, as outlined in our 25 Year Environment Plan.

Stretching from Kent to Devon, this is one of the most complex areas of the English coast and this plan will allow us to safeguard our sea life while supporting a more sustainable marine economy.

John Tuckett, Chief Executive Officer at the Marine Management Organisation, said:

This is a significant milestone for one of the most complex and used areas of the English coastline.

The South Marine Plan will help ensure that when activities take place, they happen in the best location and in the right way within the marine environment. We are now working closely with decision

makers and stakeholders along the coast to ensure that the Plan is understood and used effectively.

By 2021 all English marine area will have marine plans in place. The South Marine Plan is the second to be adopted following the introduction of the first English marine plan established in the East of England in 2014.

## Notes to editors

[short animation film to explain marine planning](#)

Further background on marine planning:

- There are 11 English marine plan areas, including inshore and offshore areas. Work continues to produce plans for the South East, South West, North East and North West, the target for adoption of the remaining plans is before March 2021.
- Marine planning addresses the key issues for the marine area, including the coast, estuaries and tidal waters, as well as developments that impact on these areas. The plans will include a vision, objectives and detailed policies on how these objectives will be achieved.
- Marine plans are used by public authorities as part of the decision making process for all new activities and developments in or affecting the marine area.
- Marine plans build on the requirements of the Marine and Coastal Access Act and the Marine Policy Statement.

[More information on marine plans is available elsewhere on GOV.UK](#)

### **How will marine plans be used?**

The plan is brought into effect through its use in decision-making. All public bodies are legally required to make all authorisation and enforcement decisions which are likely to affect the marine areas in accordance with marine plans, unless an exception states otherwise.

Such decisions vary widely and include The Crown Estate leasing the seabed for renewable energy, Environment Agency permitting of flood and coastal defence works and water discharges, Local Planning Authorities (LPAs) determining planning permissions, to Inshore Fisheries and Conservation Authorities (IFCAs) making fisheries byelaws.

The MMO will implement the adopted marine plans across all decision-making functions, including:

- Marine licensing
- Marine compliance and enforcement
- Fisheries management and effort control
- European Fisheries Funding
- Coastal operations

The MMO is working to support other relevant authorities to adopt/implement the South Marine Plan in their decision-making processes.

### **How will you enforce the plans? If it's a legal framework, is there a means to making sure people abide and what is the consequence if they don't?**

The plans aren't an enforcement tool as such, more a policy framework for the future use of the sea. (It's not a law change in that people aren't being expected to change currently occurring activity to comply with the plan.)

### **Will the plans result in activities being banned?**

The plans are not a list of prohibited activities, but a strategic vision for the sustainable use of shared marine environment seeking to maximise opportunity and encouraging co-existence between many differing marine activities.
