

Speech: Escaping the jaws of death: ensuring enough water in 2050

Speech by Sir James Bevan, Chief Executive of the Environment Agency
Waterwise Conference, 19 March 2019

New research identifies the role of the Indian Summer Monsoon on global climate change

A study led by researchers at The Open University (OU) with contributions from the British Geological Survey (BGS) has revealed new insights to help understand the historical importance of the Indian Summer Monsoon. Newly generated records of the Indian Summer Monsoon in put into context with published climate data, identified how the monsoon helped propagate warmth and moisture between the southern hemisphere with the northern hemisphere and thereby promoted global deglaciation.

Facial recognition technology aims to detect emotional state in pigs

State-of-the-art facial recognition technology is being used in an attempt to detect different emotional states in pigs.
