

# [Press release: Torcross nominated for international engineering award](#)

Torcross sea defence repair is one of 10 projects worldwide nominated for the Institution of Civil Engineers People's Choice Award 2018.

The award recognises top civil engineering projects and the winner is chosen by public vote. Anyone can vote – you can read about each of the 10 projects and vote on the [ICE Website](#). Voting closes on 28 September 2018.

The Environment Agency team based in Devon worked with contractors Bam Nuttall Mott Macdonald Joint Venture (BMM JV) to complete the £2.4m project within 14 months of problems being identified. The work was funded by Defra flood defence grant in aid.

The original seawall was constructed in the 1980s, protecting a row of properties along the seafront. Significant storms since 2014 had caused beach levels to drop, leaving the wall's foundations exposed. The winter storms of 2015/16 damaged the connecting road and caused movement in the wall and promenade. This indicated that the defence had been weakened and may no longer offer protection to adjacent properties.

The project had a tight deadline. The Environment Agency needed to identify the underlying issues with the wall and rectify them before the next winter storms arrived. The team faced a variety of challenges including tides encroaching into the working area, constrained access routes and a high risk of unexploded ordnance as Exercise Tiger – a live-fire training exercise for the D-Day landings – took place on the beach.

Environment Agency Project Manager Becky Richards said:

We would love Torcross to win this very prestigious industry award, but the competition is tough and we need votes to help us get to the top.

I'd like to thank all involved in getting us nominated, especially the local community who were really understanding throughout construction. Working with the tides meant long, noisy shifts. We couldn't have completed the project so quickly without the support of people in Torcross.

Voting for Torcross takes less than a minute and you could help a local project be recognised as the international top civil engineering project of the year. The winner of this year's People's Choice Award will be announced on 6 November 2018.

## **Notice: Police Rowing Champs: river restriction notice**

River Thames restriction information for Friday 21 September 2018.

---

## **Guidance: High Speed 2 (HS2) rail – impacts on woodland management activity: operations note 47**

7 page summary providing information on:

- HS2 – Glossary, and phases of work
  - Legislation
  - HS2 – Has permission to fell trees (Phase 1)
  - Landowner – Has a felling licence to fell trees
  - Landowner – Restocking conditions after felling
  - Landowner – Applying for a felling licence
  - Landowner – Has grant agreement for woodland creation
  - Landowner – Plans new woodland creation
  - HS2 – Plans new woodland creation
  - HS2 Phases route map
- 

## **Guidance: Assessment of potential wildfire risk resulting from planned deforestation to open habitat: operations note 40**

26 page summary offering:

- Purpose
- Background

- Context – Policy and regulation
- Planning for wildfire
- Preparing a Wildfire Management Plan (WMP)
- FC review of wildfire planning
- Contacting Fire and Rescue authorities
- Sources of further advice
- Wildfire management plan – minimum requirements
- Wildfire risk assessment template
- Wildfire risk and hazard checklist
- Example wildfire risk assessment
- Stakeholders for wildfire planning
- Template letter to Fire and Rescue Service
