

News story: UK Government Agriculture Bill – Scotland myth-buster

The UK Government's Agriculture Bill was introduced on 12 September 2018. Agriculture is devolved to the Scottish Government and will remain devolved. This Bill does not change that. Claims of 'power grab' are completely false and misleading.

The UK Government is not seeking consent from the Scottish Parliament on this Bill as we are not legislating in areas of devolved competence in Scotland.

No powers that could constrain devolved policy choices in Scotland are being introduced.

For example, there is nothing in the Agriculture Bill which will stop existing Scottish Government policies – including the Voluntary Coupled Support and Less Favoured Area Support Scheme. They will still be possible under both retained EU law and the Agriculture Bill.

Contrary to claims, Scottish farmers will continue to receive the same level of funding as they currently do until the end of this Parliament in 2022

As we leave the EU, it is our intention that each administration can independently design policies that support their farming sectors and enhance their environment.

While these policies are still under development, the Agriculture Bill demonstrates a continued commitment by the UK Government to World Trade Organization (WTO) obligations on domestic support.

The Scottish Government has claimed powers enabling us to comply with our WTO obligations should be exercised jointly; however, the Scottish Parliament does not have the legal competence to act in this area.

While this is a reserved matter, the UK Government will work closely with the devolved administrations on this given their interest. Just as we did ahead of the Agriculture Bill's introduction.

We have offered to extend powers in the Agriculture Bill to the devolved administrations which would enable them to create their own farming support systems to replace the CAP.

Wales and Northern Ireland have accepted the offer.

The Scottish Government has chosen not to take any powers in this Bill. Agriculture is devolved and that is their choice. But our offer remains on the table.

We remain in discussions with the Welsh and Scottish Governments regarding red meat levy funds and legislative options.

We will continue to work with all parts of the UK to put in place a wider common framework relating to agriculture once we leave the EU.

Scottish Secretary David Mundell said:

The UK Government has already agreed to commit the same cash total in funds for farm support for Scotland until the end of this Parliament.

This Bill ensures that new systems of farming support can be put in place after 2020 in England and Wales.

Farmers in Scotland need the same reassurance – and time is running out for the Scottish Government to act.

It is simply not acceptable for Scottish farmers to be kept in the dark about the future of agricultural policy in Scotland.

[News story: Celebrating 100 years of forestry at the UK's biggest forestry show](#)

The APF is the UK's largest woodland and forestry related show and takes place between 20-22 September 2018 at the Ragley Estate in Warwickshire.

The Forestry Commission England marquee will celebrate 100 years of the Forestry Act and the Forestry Commission. Experts will be on hand to:

- provide advice and support to the forestry sector and landowners who are looking to create and manage woodland
- explore the benefits to people, wildlife and timber of the public forest estate
- provide information on tree pests and diseases and how to reduce the threat of them
- showcase Forest Research's innovative science and research

Forestry Skills

The Forestry Commission, Royal Forestry Society and representatives from the new Forestry Apprenticeship Trailblazer group will also be in the Forest Workers' Zone of APF to talk career development and how to break into the industry.

Seminars

An in-depth Forestry Commission seminar programme will run over the three day event, covering topics including future incentives, timber markets, woodland creation and plant health challenges.

More information about the APF can be found on the [APF Exhibition website](#).

Press release: Over £14,000 pollution penalty for Staffordshire farm

In a prosecution brought by the Environment Agency, B&M Elkin & Son Ltd (the Company) of Hall Farm, Hilderstone, Staffordshire pleaded guilty to three charges of breaching environmental regulations following two pollution incidents and failing to provide adequate effluent storage.

The first incident occurred in Sept 2015 following a report of farm effluent discharging to the Gayton Brook, Milwich for several days. Investigators discovered that farm slurry had escaped from a gap in the storage pit. The incident caused effluent to run across the farm and into the brook, which was found to be green/brown in colour with a white foam, with a foul odour present. Approximately 3000 fish were killed in this incident.

A second incident occurred on 30 June 2016, when effluent entered Wheatlow Brook, which was found to be brown and frothy in appearance.

Hall Farm is within a Nitrate Vulnerable Zone which means the farm must comply with strict slurry storage capacity. Environment Agency officers advised the company that there was insufficient storage capacity and that they were in breach of the Nitrate Pollution Prevention Regulations 2010.

The company was fined £7,000, and ordered to pay £7,100 costs and a victim surcharge of £120.

In mitigation, consideration had been given that the business has been operating for 30 years without incident. The company had also cooperated with the Environment Agency and pleaded guilty at the first available opportunity. In addition, B&M Elkin & Sons Ltd had voluntarily paid £1,000 to the local wildlife trust and had spent over £20,000 in improvements and remediation at their site.

The Environment Agency Officer leading the investigation said:

These were entirely preventable serious incidents, which led to pollution of farmland and watercourses in the area, resulting in the death of thousands of fish. The fact that the first incident was subsequently repeated gave us little choice but to pursue a prosecution.

" I hope this case sends a strong message to the farming industry that their activities have the potential for serious environmental impacts, and we take action when necessary.

If farmers need help understanding the regulations that apply to them, the Environment Agency are available to help and can give advice on how to prevent farm pollution, just give us a call on 03708 506 506.
