<u>Press release: Hoteliers and haulier</u> <u>fined after waste illegally dumped to</u> <u>extend hotel car park</u>

Three North East men have been ordered to pay over £10,000 for illegally landfilling waste after a successful prosecution by the Environment Agency

David Bradley (57) and Alan Bradley (64), the brothers and joint owners of Hardwicke Hall Manor Hotel, near Blackhall in East Durham were fined £3,855 & £971 respectively. The haulier, Alan Waggott (53) of Howden-le-Wear, near Crook was fined £6,007 after appearing at Newton Aycliffe Magistrates Court today (15 August) where they pleaded guilty to various environmental offences.

Chris Bunting, prosecuting told the court that in September 2016 Environment Agency officers attended the hotel and found part of the car park, which is close to a watercourse, covered in various waste materials. Enquiries revealed that the edge of the car park had suffered from landslip, so the Bradleys had decided to repair the damaged area.

It is illegal to dispose of waste by landfilling without an environmental permit and Hardwicke Hall Manor Hotel had no such authorisations. Environmental permits safeguard people and the environment by placing controls on any activity that could pollute air, water or land.

During their inspection, Environment Agency officers witnessed a fully laden waste vehicle arrive on site belonging to Alan Waggott Haulage. The waste was seen to be of the same type which could be seen on the ground.

Photographs showed a wide range of waste materials which should never have been deposited in such a mixed state, at such a location where no permit was in place. Traces of bonded asbestos, a hazardous waste, were identified by officers although it was made clear that Waggott was responsible for only a fraction of the total waste material which had been used.

The court heard that Waggott was contracted to remove waste from construction sites in North Ormesby and Stockton-on-Tees. Whilst paperwork issued by Waggott claimed that this waste was to be deposited at a permitted landfill site, 36 wagon loads were in fact tipped for free at the hotel.

Having ordered tipping operations to stop and given instructions for the illegally tipped waste to be removed and disposed of at a permitted facility, a subsequent inspection by the Environment Agency found that additional waste had been deposited in the car park area.

In mitigation, John Elwood for the Bradleys showed photographs of fly tipped waste which formed part of the problem, and said that they never realised at the outset that a permit may have been needed. Ben Pegman for Waggott,

confirmed that his client had acted on trust, but recognised he needed to improve his working methods to ensure he was acting lawfully.

In passing sentence, the Court said there was no doubt the incident was clearly for monetary gain.

Rachael Caldwell for the Environment Agency said:

We will not tolerate abuses of the environmental permitting system. Those who ignore environmental laws can cause serious pollution to the environment, put communities at risk and undermine legitimate business and the investment and growth that go with it.

We hope that the sentencing handed down today acts as a deterrent to those who may think they can get away with it.

If you see or are aware of waste crime, you can report it by calling the Environment Agency's incident hotline on 0800 80 70 60 or call Crimestoppers anonymously on 0800 555 111.

Notice: DY13 8PX, Barhale Limited: environmental permit application advertisement

Updated: Discharge volume amended.

The Environment Agency consults the public on certain applications for waste operations, mining waste operations, installations, water discharge and groundwater activities. The arrangements are explained in its <u>Public</u> <u>Participation Statement</u>

These notices explain:

- what the application is about
- which Environment Agency office you can visit to see the application documents on the public register

• when you need to comment by

The Environment Agency will decide:

- whether to grant or refuse the application
- what conditions to include in the permit (if granted)

Notice: HR6 9NX, Roberts Poultry Limited: environmental permit issued

The Environment Agency publish permits that they issue under the Industrial Emissions Directive (IED).

This decision includes the permit and decision document for:

- Operator name: Roberts Poultry Limited
- Installation name: Lower Ledicot Poultry Unit
- Permit number: EPR/LP3331YL/V002

<u>News story: UK Government helps train</u> <u>Park Rangers in Malawi to combat the</u> <u>illegal wildlife trade</u>

After a successful pilot operation and with training now across two sites, Nkhotakota and Majete Wildlife Reserves, both are managed by African Parks in partnership with Malawi's Department of National Parks and Wildlife (DNPW). The troops long-term goal will ensure the rangers are better skilled and able to respond appropriately to the threat of poaching.

Poaching and the illegal wildlife trade are responsible for the loss of countless species and are driving the decline of many African animals including elephants, rhinos and lions.

Defence Secretary Gavin Williamson said:

We can be incredibly proud of the important work our Armed Forces are doing to help protect the magnificent animals of Malawi and to bring about the end of the cruel practice of illegal wildlife trading. By passing on their world-class, tried and tested skills, we can be sure that UK troops are aiding a highly skilled and professional network of park rangers, one that can effectively combat the threat poachers pose to the African wildlife.

While British soldiers are working with rangers to support the protection of wildlife, the Department for International Development is working with poorer communities who live close to wildlife reserves to create job opportunities and improve vital services.

Foreign Office Minister for Africa Harriett Baldwin visited communities living on the edge of Majete Wildlife Reserve where she announced an additional f1 million of UK aid support to improve the lives of people living next to national parks.

Minster for Africa Harriett Baldwin said:

The UK is acting now to stamp out the illegal wildlife trade, which not only threatens the existence of some of our most precious species, but also inflicts damage on local communities and fuels corruption and crime which hold back development for some of the world's poorest countries.

By bringing together our diplomatic, military and development support we're helping countries like Malawi combat this crime, and also helping local people to benefit from living alongside these beautiful species, which is boosting economic growth and stability.

The increase in the UK Armed Forces' support to Malawi has been funded by the Department for Environment, Food and Rural Affairs' (DEFRA) as part of a three-year plan agreed by the Ministry of Defence and DEFRA.

Environment Secretary Michael Gove said:

Wildlife crime does not respect borders so we must share skills and expertise worldwide. The Malawi enforcement project demonstrates the global leadership we set out in the 25 Year Environment Plan. We are introducing one of the world's toughest bans on ivory sales and will host the next international Illegal Wildlife Trade conference in London later this year. The Government of Malawi has taken an effective and proactive approach to combating the illegal wildlife trade in their country, enhancing penalties for wildlife crime and partnering with African Parks and the UK Government to drastically reduce poaching activity and secure its parks for the benefit of future generations.

The CEO of African Parks, Peter Fearnhead said:

The Malawian Government has shown great leadership and commitment in conserving its parks, where together we've recruited, trained and outfitted rangers to establish robust law enforcement teams utilising technology and community engagement to secure the landscapes.

Effective park management, including law enforcement and community development, is essential in protecting the last of the wild and combatting the illegal wildlife trade at its source. The partnership with the UK Government importantly advances our ability to ensure that these increasingly threatened areas continue to function as critical sanctuaries benefitting millions of people and animals across Africa.
