Policy paper: Updated short-term traded carbon values used for UK policy appraisal (2017)

BEIS's short-term traded carbon values for UK public policy appraisal are used for valuing the impact of government policies on emissions in the traded sector, that is those sectors covered by the EU Emissions Trading System (EU ETS). Short-term values quoted in this paper correspond to the period up to 2030 and long-term values correspond to the period post-2030.

Policy paper: Updated short-term traded carbon values used for modelling purposes (2017)

Updated short-term traded carbon values used for modelling purposes have been used in the latest update to [BEIS's Energy and Emissions projections](#) and will be used in other models of electricity generation and investment across government.
