

Notice: AL7 1AN, Gilbertson & Page Limited: environmental permit issued

The Environment Agency publish permits that they issue under the Industrial Emissions Directive (IED).

This decision includes the permit and decision document for:

- Operator name: Gilbertson & Page Limited
- Installation name: Brownfields Pet Food Factory
- Permit number: EPR/YP3135YD/A001

World news story: UK Space Agency to run £2.2mil project in Malaysia & Indonesia

The UK Space Agency (UKSA) will be running a £2.2 mil project in Malaysia and Indonesia to use satellite observations and measurements to monitor peatland areas, thereby reducing the occurrence of forest fires and haze in South East Asia. The project, named Peatland Assessment in SE Asia by Satellite (PASSSES) will be delivered by CGI IT UK Ltd in partnership with the Global Environment Centre (GEC) of Malaysia.

The state-of-the-art project will map peat condition using observations from satellites through the EU Copernicus programme and emerging industrial hosted processing capabilities. By monitoring water levels and improving hydrology in the peatland areas, the risk of fire can be dramatically reduced.

Her Excellency Vicki Treadell CMG MVO, the British High Commissioner to Malaysia, welcomed the initiative and said:

This project is the latest example of the UK's partnership with Malaysia in tackling global environmental challenges. This cutting-edge UK space technology will monitor risk areas, so it helps to reduce forest and peatland fires as well as haze that they cause. As such it will also reduce the significant health risks from haze as well as global CO2 emissions. So whether on the ground or now from space, Britain's partnership with Malaysia is helping to improve the lives of Malaysians and the environment in which they live.

Faizal Parish, Director of Global Environment Centre (Malaysia) said:

The PASSES project will further develop and demonstrate new cost effective satellite technology suitable for detecting and monitoring vertical displacement over very large peatland areas. As such it will be highly strategic in enabling more efficient targeting and monitoring of results of management actions including water management and peatland restoration as well as supporting fire and haze prevention, both in Malaysia and Indonesia. PASSES is one of 10 new projects under UKSA's International Partnership Programme announced by the UK Science Minister Sam Gyimah on 8 Feb 2018. The projects underline the importance of bringing together the UK's world-class research and expertise to deliver innovative solutions to real world problems across the globe.

The successful projects, worth £38 million in total, are led by a diverse range of organisations from the UK's growing space sector, from large companies such as Inmarsat and CGI, to start-ups such as Guildford-based Earth-i. The UK Space Agency and industry are working together to grow the UK's share of the global space market to 10% by 2030.

Science Minister Sam Gyimah said:

The UK Space Agency's International Partnership Programme will help developing countries tackle big issues like disaster relief and disease control, while showcasing the services and technology on offer from our leading space businesses.

The International Partnership Programme is part of the UK's Department for Business, Energy and Industrial Strategy's Global Challenges Research Fund. It is a £1.5 billion fund from the UK Government, which supports cutting-edge research and innovation on global issues affecting developing countries.

[Press release: Nationwide waste crime investigation: two arrested in London](#)

In a joint operation by the [Environment Agency](#), [the Metropolitan Police Service \(MPS\)](#) and Government Agency Intelligence Network (GAIN), a 29-year-old man and a 46-year-old man were arrested for questioning in relation to waste crime, fraud and money laundering offences across the country.

The pair are believed to be involved in organised crime across the country,

including in Lancashire, Middlesbrough, Lincolnshire, Cambridgeshire and Kent.

Organised crime

Both men were arrested at their homes in Chelsea and Hampstead Heath. The properties were also searched as part of the investigation.

Environment Agency team leader Mark Rumble said:

These arrests are part of extremely serious organised crime activity, which involves the dumping of illegal waste, fraud and money laundering across the country. We are working closely with partners to share intelligence on illegal waste activity to ensure the culprits are brought to justice.

We need everyone to play their part in the fight against waste crime – an issue that blights communities and drains valuable resources. Property and landowners are encouraged to be vigilant and report suspicious illegal activity to the Environment Agency.

Multiple agencies involved

The London GAIN co-ordinator said:

Working in partnership, sharing intelligence lawfully and efficiently, the GAIN aims to ensure that government agencies along with law enforcement will help reduce serious and organised crime, in the most cost effective way. This action is an excellent example of adopting a multi-agency approach.

Detective inspector Tim Court, Metropolitan Police Organised Crime Command, said:

Organised crime has many forms but always exploits and undermines individuals, businesses and society for financial gain. It is critical that different parts of the government work together to tackle organised crime, holding offenders to account and removing the financial incentive for their offending. Today's activity has proven that the MPS and organised crime advisors will take action against those involved in any organised criminal activity in order to protect London.

To report illegal waste activity, please call the Environment Agency's incident hotline on 0800 80 70 60 or anonymously to [Crimestoppers](#) on 0800 555 111.

Advice to land and property owners

- Check any empty land and property regularly, and make sure it is secure.
 - Carry out rigorous checks on prospective and new tenants. Land and property owners have a responsibility to ensure anyone leasing their land/property complies with regulations. They may be committing an offence by allowing waste to be stored on land or property without the relevant permissions, leaving them liable to prosecution.
 - Be vigilant and report any unusual behaviour.

[Press release: Anglers caught](#)

illegally fishing to pay £1,700

On 12 February 2018, at Guildford Magistrates court, Lee Grant, 38, of Eton Road, Southsea, and James Black, 29, of Heathyfields Road, Farnham were each fined £660 for fishing without a fishing licence, with costs of £127 and a victim surcharge of £66 imposed after a prosecution by the Environment Agency. The total penalty was £853 each.

Magistrates heard that on 23 September 2017, an Environment Agency enforcement officer found Lee and James fishing at Badshot Lea Ponds, Badshot Lea. A valid fishing licence is required to fish all waters in England. Neither were able to produce a valid fishing licence and were reported for that offence.

James and Lee were each convicted in their absence.

David Brain, of the Environment Agency said

The majority of anglers fish legally and purchase a fishing licence. We invest the money from fishing licences back into fisheries improvements, fish stocks and fishing, this is essential for the future of the sport.

The minority of anglers that fail to buy a fishing licence are cheating their fellow anglers and the future of the sport. In addition fishing licence cheats risk a criminal conviction, a significant fine and could lose their fishing equipment.

During 2015-16 the Environment Agency checked more than 62,000 fishing licences and prosecuted more than 1,900 anglers for rod and line offences resulting in fines and costs in excess of £500,000.

Anyone witnessing illegal fishing incidents in progress can report it directly to the Environment Agency hotline, 0800 80 70 60. Information on illegal fishing and environmental crime can also be reported anonymously to Crime stoppers on 0800 555 111.

You need a valid Environment Agency Fishing Licence if you are aged 12 or over and fish for salmon, trout, freshwater fish, smelt or eel in England.

Junior fishing licences (aged 12-16) are now free, but you must still get a fishing licence online at www.gov.uk/get-a-fishing-licence.

Notes:

Try fishing. There are lots of events for spring and summer 2018 listed at www.getfishing.org.uk.

All media enquiries: 0800 141 2743.
Please ask for the duty press officer.
