

Press release: Nottingham man arrested in connection with Walesby Fire

A 41-year-old man was today (Wednesday Nov 8) arrested for questioning in relation to a fire which burned for over two weeks on a farm near Walesby in north Nottinghamshire last September.

He was arrested in a joint operation involving officers from the Environment Agency and Nottinghamshire Police.

He is being questioned in connection to a fire at Oakfield Farm, in Forest Lane, Walesby, which contained dumped illegal waste.

No permit existed for waste to be stored on the farm.

The man from the Sneinton area of Nottingham was also answering questions about two other enquiries following the discovery of illegal waste at a site on Hathernware Industrial Estate in Loughborough and a farm in Leicestershire.

When officers entered the property in Sneinton they discovered around 40 suspected cannabis plants. The man is also being questioned over this matter.

Peter Haslock, Area Enforcement Team Leader for the East Midlands, said:

The arrest was made as part of a joint investigation involving enforcement officers from the Environment Agency and colleagues from Nottinghamshire Police.

We know the Walesby site did not have a permit for waste activity and we believe the waste was involved in the fire.

These are extremely serious cases and the Environment Agency is determined to bring the culprits to justice.

We are working closely with partners to share intelligence on illegal waste activity. And we're encouraging property and land owners to be vigilant.

Anyone who sees waste crime taking place is advised not to approach as these people can be dangerous.

Report it by calling our incident hotline on 0800 80 70 60 or anonymously to Crimestoppers on 0800 555 111.

Advice to land and property owners:

- Check any empty land and property regularly and make sure it is secure.
- Carry out rigorous checks on prospective and new tenants. Land and

property owners have a responsibility to ensure anyone leasing their land/property complies with regulations. They may be committing an offence by allowing waste to be stored on land or property without the relevant permissions and could leave them liable to prosecution

- Be vigilant and report any unusual behaviour.

Notice: M17 1PA, Cargill plc: environmental permit issued

The Environment Agency publish surrenders that they issue under the Industrial Emissions Directive (IED).

This decision includes the surrender notice, decision document and site condition report evaluation template for:

- Operator name: Cargill plc
- Installation name: Trafford Park Wheat Milling Plant
- Permit number: EPR/BM0117IJ/S006

Notice: HU11 4RE, GB-Bio Limited: environmental permit issued

The Environment Agency publish permits that they issue under the Industrial Emissions Directive (IED).

This decision includes the permit and decision document for:

- Operator name: GB-Bio Limited
- Installation name: Tansterne Biomass Power Plant
- Permit number: EPR/WP3738DE/A001

Notice: HR2 9TR, Mr William Watkins:

environmental permit issued

The Environment Agency publish permits that they issue under the Industrial Emissions Directive (IED).

This decision includes the permit and decision document for:

- Operator name: Mr William Watkins
- Installation name: Arkstone Court
- Permit number: EPR/EP3236ZU/V004

Press release: Public asked to comment on Medway Estuary flood defence strategy

Members of the public are being invited to share their views on the Environment Agency's strategy to protect areas of the north Kent coast over the next century.

The [online public consultation](#) opens today, 6 November 2017, allowing people to view the Environment Agency's plans on how best to best protect people, properties, wildlife habitats and agricultural land from flooding and coastal erosion in the Swale and Medway Estuary Area.

The Medway Estuary and Swale Strategy outlines the best technical solution for flood defence while considering the impact and benefits to local communities and the environment, as well as the cost to the taxpayer. It covers the Medway towns of Stoke, Sittingbourne, Conyer and Faversham, in addition to the Isle of Sheppey and the Medway Estuary.

Rising sea levels could result in the loss of nationally and internationally designated wildlife habitats in the area, which might be 'squeezed' against existing defences. The strategy therefore considers whether existing defences could be moved inland and the coastline returned to a more natural state, or whether habitat could be created elsewhere.

Mark Douch, Area Flood and Coastal Risk Manager, said:

The project team has developed leading options for each section of the strategy area, based on economic, technical, and environmental appraisals.

We are keen to hear comments and feedback from the public on the

proposed flood and coastal management options. We want to make sure we have captured all information before finalising the strategy.

The consultation runs until 5 February 2018.

Members of the local communities and key stakeholders are invited to review the proposed options for the management of coastal flood and erosion risk at public exhibitions being held at:

- Eastchurch Village Hall, Isle of Sheppey, 3pm to 7pm, 30 November 2017.
- Riverside Country Park, Gillingham, 3pm to 7pm, 6 December 2017.
- Halling Community Centre, 3:30pm to 7:30pm, 12 December 2017.
