

Press release: Opportunity for residents and business to find out more about plans to reduce flood risk in Otley

Otley residents and businesses are being invited to come along and meet the team at a drop-in event on Tuesday 17 October.

Visitors to the drop in will have an opportunity to meet representatives from Leeds City Council, Environment Agency, Yorkshire Water and WSP (consultants undertaking survey and investigation work). It will also be a chance to find out more about plans to reduce the risk of flooding in the historic market town and provide feedback, which the team hopes to use in the early stages of the programme to develop the Otley Flood Alleviation Scheme.

The drop in will be held at The Core Otley, Unit 11 Orchard Gate, Otley LS21 3NX, on Tuesday 17 October between 4pm and 7pm.

The town suffered flooding on three occasions between November and December 2015, which saw 74 properties affected. In the Autumn Statement 2016, Government announced £2 million to invest in a scheme to reduce the risk of flooding to homes and businesses.

The scheme is being led by Leeds City Council working closely with the Environment Agency.

Leader of Leeds City Council Councillor Judith Blake said:

We are firmly committed to taking a whole catchment and citywide approach to flood prevention in Leeds, which is why the plans for the Otley Flood Alleviation Scheme are so important to help provide confidence and reassurance to our communities who currently live in areas of flood risk. We would encourage as many people as possible to attend the drop-in session to find out more and give us their views, as local people have a key role to play in helping us to get this right.

John Woods, flood risk management advisor at the Environment Agency said:

We're committed to keeping the people of Otley updated on progress around the development of a flood alleviation scheme for Otley. The drop-in event not only serves as a way for residents to meet the team, but also as a means for us to gather their feedback to help us develop the best possible scheme for the town.

Work to pull together data to better understand the potential paths of flood water as well as collating historic and recent flood information began earlier this year. The information from these investigations, carried out by consultants, WSP, will be used to update an existing digital model of the River Wharfe which can then help form potential options for a scheme.

The Otley Flood Alleviation Scheme is one of several schemes that is adopting a catchment-wide approach. This means the entire River Wharfe catchment area will be considered to help reduce flood risk. This approach looks at a combination of natural processes and engineered options to help slow the flow and catch water further up the catchment so that flood peaks are reduced further downstream.

Press release: Badsey Brook flood scheme open day

The open day will be held on Wednesday 25 October between 2pm and 6pm at:

West End Lane (access via site entrance)

Broadway

It will give visitors the opportunity to see the construction works in action and the progress made so far. Members of the Environment Agency project team will also be available to provide information and answer questions people may have.

Broadway, Childswickham and Murcot were severely flooded in 2007 following record-breaking rainfall across the area. The £4 million flood storage area in Broadway will be able to hold up to 135,000 cubic metres of water during times of flood and will only allow a set amount of water to flow downstream at times of intense and high rainfall. This will reduce flood risk along the Badsey Brook downstream of Broadway.

The scheme, which will reduce the risk of flooding to around 290 homes and businesses, is due to be completed in spring 2018.

Dan Wilkinson from the Environment Agency said:

This is a significant scheme for residents living in Broadway, Childswickham and Murcot who know only too well the devastating impact flooding can have. The open day will give them an opportunity to see the work in action and see for themselves how, once completed, the scheme will help reduce the risk of flooding.

Councillor Barrie Parmenter, Chairman for Broadway Parish Council, said:

Broadway Parish Council are delighted that the project is progressing well and which when completed, will improve the lives and alleviate the worries of many residents of Broadway and the surrounding area.

Press release: River transfer project gives local communities more say

A project designed to give local organisations and communities more say over the management of local watercourses has entered a new phase with the launch of public drop-ins in four pilot areas throughout October 2017.

The project is exploring the potential to re-designate several sections of selected 'Main Rivers' as 'Ordinary Watercourses,' (a process known as 'de-maining') where – in agreement with the Environment Agency – partners such as Internal Drainage Boards (IDBs) or Lead Local Flood Authorities (LLFAs) are keen to take on the lead role of local watercourses.

The project is piloting these changes in 5 locations. 4 of these locations are now approaching the consultation stage of the process and drop-in events will be held in:

- areas of Norfolk and Suffolk
- Stour Marshes in Kent,
- The Isle of Axholme in the East Midlands
- South Forty Foot Catchment in Lincolnshire

The final pilot at Wormbrook and Allensmore Brook in the West Midlands will be running to a different timeline.

The project aims to bring significant benefits to local communities, allowing those who know the layout of their land to take control of their local watercourses, and could help pave the way for further de-maining opportunities throughout England.

For the Environment Agency, the project will also ensure resources are prioritised where the greatest impact on reducing flood risk can be achieved.

Rachael Hill, Flood and Coastal Risk Manager for the Environment Agency, said:

We are working with local organisations to strengthen local decision-making. Internal Drainage Boards and Lead Local Flood Authorities are very much on the ground in communities so giving them responsibility over their own watercourses is a win-win

situation that will ensure that the right people are managing the right watercourses in the right places.

We welcome the launch of the community drop-in sessions and we look forward to working together on this project to benefit people and the environment.

Innes Thomson, Chief Executive of the Association of Drainage Authorities (ADA), added:

This is an unmissable opportunity for local communities to have their say on how they would like to see their local watercourses managed in the best way to make use of the funds available, whilst improving the quality of those watercourses, the environment and community wellbeing associated with healthy, maintained rivers and streams.

The drop-in sessions are an ideal way to find out more about the plans, help allay possible concerns and, very importantly, to provide support for these trials so please do try and find time to come to one of them.

Gaining local support for the transfer of watercourses through engagement and consultation is essential for the success of the project. The public drop-ins will be an opportunity for local communities and interested parties to ask questions and influence the proposals.

This will be followed by a formal consultation on GOV.UK currently scheduled for December 2017 which will seek further views on the proposals. If there are no objections, changes to the watercourse will take place in July 2018.

Drop-in sessions:

East Midlands:

Date	Time	Location
26 October	2pm-5pm	Haxey Chapel- Stephen Jones Community Hall, DN9 2LA
31 October	10am-1pm	Coronation Hall, DN9 1RL

Lincolnshire:

Date	Time	Location
9 October	1pm-6pm	Rippingale Village Hall, PE10 0TA
11 October	1pm-6pm	Billingborough Village Hall, NG34 0QH
18 October	1pm-6pm	Helpringham Memorial Hall, NG34 0RJ

Norfolk and Suffolk:

Date	Time	Location
16 October	2pm-7pm	Kettlestone Village Hall, NR21 0AU
19 October	2pm-7pm	Dereham Memorial Hall Meeting Room, NR19 1AD
24 October	2pm-7pm	Halesworth Methodist Church, IP19 8LR
26 October	2pm-7pm	Wymondham Central Hall, NR18 0QB
27 October	3pm-7pm	Hunstanton Community Centre, PE36 5BW
31 October	2pm-7pm	Sea Palling and Waxham Village Hall, NR12 0US

Stour Marshes:

Date	Time	Location
4 October	2pm-7pm	Minster Village Hall, CT12 4BU
19 October	2pm-7pm	Little Chart Village Hall, TN27 0QB
25 October	2pm-7pm	Great Mongeham Parish Hall, CT14 9LL

[Press release: River transfer project gives local communities more say](#)

A project designed to give local organisations and communities more say over the management of local watercourses has entered a new phase with the launch of public drop-ins in four pilot areas throughout October 2017.

The project is exploring the potential to re-designate several sections of selected 'Main Rivers' as 'Ordinary Watercourses,' (a process known as 'de-maining') where – in agreement with the Environment Agency – partners such as Internal Drainage Boards (IDBs) or Lead Local Flood Authorities (LLFAs) are keen to take on the lead role of local watercourses.

The project is piloting these changes in 5 locations. 4 of these locations are now approaching the consultation stage of the process and drop-in events will be held in:
