

## **Research and analysis: Future of the sea: biological responses to ocean warming**

This report summarises evidence of changing sea temperatures. It explores the current and future impacts of this on:

- marine life
- the UK fisheries and aquaculture industries
- environmental conservation, including the UK's marine protected area network

It was commissioned as part of the [Foresight Future of the sea project](#).

---

## **Research and analysis: Future of the sea: ocean acidification**

This report summarises evidence of the changes to and drivers of ocean acidification. It explores the current and future impacts of acidification on:

- marine life and environmental conservation
- the UK fisheries and aquaculture industries
- future research needs

It was commissioned as part of the [Foresight Future of the sea project](#).

---

## **Research and analysis: Future of the sea: health and wellbeing of coastal communities**

This report summarises the evidence on the drivers of and growing threats to the health and wellbeing of coastal communities. These include:

- the current health status of UK coastal communities

- economic and demographic drivers of change
- threats to health from the changing environment, including pollution and climate change

It was commissioned as part of the [Foresight Future of the sea project](#).
