

## Press release: Yorkshire Water fined £600,000 for polluting a Staithes watercourse with sewage sludge

Yorkshire Water has been fined £600,000 for polluting a Staithes watercourse with sewage that had leaked out from a poorly-maintained storage tank.

The company was sentenced on Thursday 13 July at Leeds Crown Court, after admitting one charge of causing a water discharge activity into Dales Beck, at Dalehouse, without an environmental permit.

The pollution originated from the firm's Hinderwell Waste Water Treatment Works in July 2015. It had leaked from a poorly-maintained, rusting sludge storage tank, which had holes in it.

Richard Bradley, prosecuting for the Environment Agency, told the court that the sewage had a significant impact on the quality of the water in the beck. The watercourse, which passes through a caravan park, was discoloured and had a foul odour. Up to 100 dead fish were seen, and water quality tests revealed high levels of ammonia and low dissolved oxygen levels.

Downstream, the pollution incident affected water quality in Staithes Harbour, which was a designated bathing water at the time. An 'abnormal situation' was declared for 17 days during the peak holiday season and Scarborough Council erected signs advising the public not to enter the water.

Yorkshire Water initially blamed works at the nearby Potash Mine for the water discolouration, but four days after the spill they used dye testing to trace the source back to the treatment works.

Sewage sludge could clearly be seen in the yard near the tank, and from there it had entered Dales Beck via a small ditch below the Sewage Works. Yorkshire Water did not immediately clean up the yard because it believed the sludge was contained on the site and would be recirculated back into its treatment process. However, the firm's own site user manual stated that the site drainage is not sealed. This was not picked up by the company and the sewage was in fact discharging into the watercourse.

The court heard that, as well as causing the pollution, Yorkshire Water also failed to act quickly in cleaning it up. In August, the Environment Agency asked the firm to provide a plan for how it was going to clean up the mess, but no reply was received. After further visits and correspondence, the company was still cleaning sewage sludge from the water on 19 October, some three months after the incident.

In sentencing, His Honour Judge Khokhar said the company had been reckless, rather than just negligent.

Claire Campbell, environmental planning specialist at the Environment Agency,

said after the hearing:

This case demonstrates how important it is that water companies and wider industries maintain their equipment and facilities to a high standard in order to protect the environment. This pollution incident had a significant impact on the ecology of the watercourse, as well as an impact on the amenity of a caravan park and Staithes beach.

In mitigation, Yorkshire Water told the court that it had invested in measures to prevent the incident recurring. A gully guard had been installed to contain any future spillages within the site, and an alarm had been installed on the sludge tank. The tank has now been replaced.

The company was also ordered to pay £28,078.10 in legal costs.

## **Press release: Close season offenders risk court appearance and £50,000 fine**

The Environment Agency reported 122 offences of fishing during the close season, following 670 patrols carried out in the restricted period. The targeted patrols also detected 179 other offences, mainly unlicensed fishing.

Environment Agency Fisheries Enforcement Officers were supported by 232

Angling Trust Voluntary Bailiff Service members, carrying out over 5,000 hours of patrols under Operation CLAMPDOWN. Now in its 5th year, Operation CLAMPDOWN is a joint initiative between the Environment Agency, Angling Trust's Fisheries Enforcement Support Service, UK National Wildlife Crime Unit and police forces, aimed at gathering intelligence about illegal fishing and responding through targeted patrols. The volunteers reported 111 suspicious incidents to the Environment Agency and police.

The coarse fish close season restrictions are imposed in order to protect vulnerable spawning fish, helping to safeguard fish stocks for the future. Patrols took place across rivers, streams, drains and specific canals and stillwaters covered by the coarse fish close season byelaw, which runs from 15th March – 15th June inclusive.

Judy Proctor, Acting Deputy Director for Fisheries at the Environment Agency, said:

The vast majority of anglers fish legally; sadly there is a small number of anglers who cheat others by fishing during the close season. The coarse fishing close season helps protect vulnerable spawning fish – this is why it's in place. It is still possible for anglers to fish during this time on many stillwaters and canals, which are open all year round.

We respond to the intelligence we receive about illegal fishing by ensuring our patrols are targeted at the right places – and the right people.

Dilip Sarkar MBE, Angling Trust National Enforcement Manager, said:

These figures show that during Operation CLAMPDOWN 5, Phase 1 Volunteer Bailiffs throughout England demonstrated their massive commitment to protecting fish and fisheries and cracking down on illegal fishing. All anglers can help this process, in fact – at any time of year – by reporting information and offences in progress to the Environment Agency on 0800 80 70 60, or the police on 101/999 as appropriate.

The enforcement work was supported through a network of 474 Angling Trust volunteer bailiffs covering all counties in England. Patrolling under operation CLAMPDOWN for a 5th year, they assisted by reporting illegal fishing incidents and information to the Environment Agency and police.

Anyone who suspects illegal fishing to be taking place should report the matter to the Environment Agency's incident hotline on 0800 80 70 60.

Notes to editors

- Enjoy fishing and make sure you fish legally

- Annual fishing licences from only £30
  - It's easy to buy online. [Get a Fishing Licence](#)
  - All fishing licence income is used to fund work to protect, improve and develop fisheries, fish habitats and angling.
  - Go fishing – Find out about angling events, fisheries and venues so you can [go fishing](#)
  - The Environment Agency is cracking down on illegal fishing
  - The reason why it is illegal to fish on rivers, streams and some specific canals and stillwaters. Due to many waters being under multiple ownership we apply legislation in a precautionary approach. This helps to protect vulnerable fish during spawning time. In addition fishery managers are free to impose close season rules at any time should they consider it necessary to protect their fish stock
