

[National Statistics: Provisional UK greenhouse gas emissions national statistics 2016](#)

This publication provides the latest provisional estimates of UK greenhouse gas emissions based on provisional inland energy consumption statistics, which are published in BEIS's quarterly Energy Trends publication.

For the purposes of reporting, greenhouse gas emissions are allocated into a small number of broad, high level sectors as follows: energy supply, business, transport, public, residential, agriculture, industrial processes, land use land use change and forestry (LULUCF), and waste management. Additionally provisional emissions for Carbon Dioxide (CO₂) only are allocated into broad fuel classifications as follows: gas, oil, coal, other solid fuels and non-fuel.

These provisional emissions estimates are subject to revision when the final estimates are published; however, they provide an early indication of emissions in the most recent full calendar year.

This is a National Statistics publication and complies with the Code of Practice for Official Statistics. Please check our frequently asked questions or email Climatechange.Statistics@beis.gov.uk if you have any questions or comments about the information on this page.

[Notice: GL20 8HY, Hern, Hern and Hern \(Trading as F C Jones & Co\): environmental permit application advertisement](#)

Updated: Extension of consultation period agreed

The Environment Agency consults the public on certain applications for waste operations, mining waste operations, installations, water discharge and groundwater activities. The arrangements are explained in its [Public Participation Statement](#)

These notices explain:

- what the application is about
- which Environment Agency office you can visit to see the application documents on the public register
- when you need to comment by

The Environment Agency will decide:

- whether to grant or refuse the application
- what conditions to include in the permit (if granted)
