

Notice: National Trust (Renewable Energy) Limited: application made to abstract water and impound water NPS/WR/023281

The Environment Agency consult the public on certain applications for the abstraction and impoundment of water.

These notices explain:

- what the application is about
- which Environment Agency offices you can visit to see the application documents on the public register
- when you need to comment by

Official Statistics: UNECE Timber Forecast Questionnaire: 2017 forecasts

The UNECE Timber Forecast Questionnaire (TF) collects estimates for the current year and forecasts for the coming year of removals, production and trade of wood and wood products. Statistics are collected annually by the UNECE.

Official Statistics: Joint Forest Sector Questionnaire: Final 2016 data

This release contains the data on UK wood production, imports and exports to be submitted to international organisations for the production of international statistics on forest products.

[Official Statistics: Woodland Carbon Code statistics: data to September 2017](#)

This release provides quarterly statistics on projects registered under the Woodland Carbon Code. The Woodland Carbon Code is a voluntary standard, initiated in July 2011, for woodland creation projects that make claims about the carbon they sequester (take out of the atmosphere). All projects must be placed on the Register of UK Woodland Carbon Projects. Their claims about potential carbon sequestration are validated by an independent certification body. Validated projects are then verified on a regular basis to confirm the progress of carbon sequestration.

[National Statistics: Food statistics pocketbook 2017](#)

Updated: Added request for feedback link to the Global and UK supply chapter.

This annual publication provides a round-up of statistics on food covering the economic, social and environmental aspects of the food we eat (excluding agriculture). It contains sections on:

- the food chain
- prices and expenditure
- global and UK supply

Accompanying data sets and data sources

The information in the pocketbook comes from previously published government surveys run by the Office for National Statistics (ONS) and the Department for Environment, Food and Rural Affairs (Defra) and a wide range of other sources including government agencies and commercial organisations. The publication carries the National Statistics logo but is a combination of National Statistics and other statistics. Those which are National Statistics are identified as being so. Data quality varies among the many data sources and where possible an indication is included in bullet points. For more information see the data set that accompanies each chapter of the main publication.

Data uses

Researchers put this data to a wide range of uses spanning from informing decisions on the general public's choices through to local food policy making. It is often used for statistics on the food industry, on food prices, on balance of diet, international comparisons and food production to supply ratio.

Next update: see the [statistics release calendar](#)

Please answer [4 short questions \(opens in Google Forms\)](#) to help us make the pocketbook better for you.

HTML format

We've published this year's food statistics pocketbook as a HTML publication. We would like your feedback on this new approach and if you think there is anything we can improve? You can contact us via email or Twitter.
