

Corporate report: Dalton Cumbrian Facility: celebrating a 10-year journey to success

The world-class Dalton Cumbrian Facility was developed jointly by the NDA and The University of Manchester. Each party contributed £10 million to develop the cutting-edge research facility in west Cumbria.

DCF is designed specifically for carrying out research into:

- radiation science
- nuclear engineering decommissioning

It was built in 2011 and became fully operational during 2012 following the commissioning of its ion beam particle accelerator (Pelletron).

Scientists from across the UK use DCF facilities to simulate several decades of radiation exposure in an operating environment. This provides important data for lifetime behaviour predictions and models.

Guidance: Countryside Stewardship: woodland creation grant manual 2018

Updated: Send applications for woodland creation grant to Natural England's Crewe office, not your local office.

The woodland creation grant is a standalone capital grant under Countryside Stewardship. Farmers and other land managers can apply for a 2 year capital works programme to plant and protect young trees. If you're eligible, a supporting maintenance grant of £200 per hectare for 10 years may also be available.

Apply for woodland creation funding for 2018 from 2 January to 16 February 2018.

Send completed applications to:

Natural England Technical Services, PO Box 380, Crewe, CW1 6YH

Tel: 0208 026 1805

Don't send to your local office as stated in the manual.

Read the 2018 manual on this page for guidance on making an application and agreement conditions.

See the main [Countryside Stewardship](#) page for more information about this scheme.

Woodland creation 2017 agreement holders should refer to the [woodland creation grant manual 2017](#) for their agreement conditions.

[Press release: Environment Secretary meets Scottish industry leaders on the](#)

future of UK farming and fishing

Environment Secretary Michael Gove met Scottish farming and fishing leaders today to discuss the future of their industries outside the EU.

Representatives from across the Scottish farming and fish processing sectors attended the meetings with the Secretary of State at Aberdeen's James Hutton Institute, a hub for environmental and farming innovation.

The meetings focused on the specific opportunities and challenges facing Scottish farmers and fishing businesses as we prepare to leave the EU.

Farming groups including NFU Scotland, the Scottish Food and Drink Federation and the Scottish Tenant Farmers Association attended to share their ambitions and expectations for future farming policy.

And in a further meeting, representatives from the Scottish Seafood Association, Associated Seafoods and a wealth of processing companies set out their desires for future trade and the needs of the Scottish supply chain.

The meetings also focused on how Scotland's entrepreneurial farmers and fishermen can make the best use of innovation and new technology to boost productivity.

Speaking after the meetings, Environment Secretary Michael Gove said:

Aberdeen is a city extremely close to my heart and one with proud traditions in both farming and fishing. Both industries are part of the fabric of daily life for so many people in the North East, but they are also vitally important for the local and national economies, together contributing over £10 billion. I'm determined to see them go from strength to strength outside the EU.

Today's discussions were very productive and helpful as we take forward this once in a lifetime opportunity to design a new approach that can deliver a brighter future for Scottish farmers and fishermen.

There are undoubtedly challenges ahead, but if we work together I believe there can be great rewards. I'm committed to working with the Scottish farming and fishing industries to make sure we secure a smooth transition and grasp the opportunities that leaving the EU presents.

The roundtables held today are part of a series of ongoing engagements across all parts of the UK ahead of EU exit.

[News story: Tony Fountain to step down from his role as Chair of Sellafield Ltd](#)

He will chair his last Board later this month.

The Nuclear Decommissioning Authority (NDA) will now begin the process of finding a suitable successor to continue the momentum created under Tony's tenure.

Nigel Smith, a senior independent Non-Executive Director with Sellafield Ltd, will cover the role in the interim.

David Peattie, NDA Chief Executive Officer, said:

On behalf of the NDA, I would like to offer my sincere thanks to Tony for his excellent leadership and contribution to the clean-up mission at Sellafield. We wish him every success in his new role.
