

# Press release: Waste scam warning for Lincolnshire farmers and landowners

In the last week the Environment Agency's environmental crime team have dealt with two new incidents where farmers have been approached and asked if they want tarmac road planings that can be used to repair roads and farmyards on their land. After accepting the offer and cash they found bales of landfill waste dumped on their land instead of the expected road planings, leaving them with an environmental liability and a bill to transport and remove the waste to an authorised disposal site.

Farm insurance policies often do not cover poor business ventures. The first farmer had 25 bales deposited on his land this week, including transport and disposal of the waste to a permitted disposal site; this could cost the farmer approximately £3,000.

The second farmer had approximately 2,500 bales deposited on his land. The cost of disposal at a permitted disposal site could result in a bill of approximately £300,000.

The Environment Agency is urging all landowners to be wary and not become the next victim of illegal waste disposal and dumping.

Advice from the Environment Agency includes:

- use reputable agents and brokers
- carry out suitable checks and due diligence, i.e. get the individuals details, vehicle registration, ask where the waste is coming from (address, permit number, waste carriers registration)
- inform them you'll be contacting the Environment Agency or call us whilst they are there
- don't agree to accept any waste until you have carried out some checks and had a cooling off period to fully consider the offer

Peter Stark, Senior Enforcement Officer, said:

Criminals operating in and around the waste industry can be very convincing and persuasive, sometimes offering thousands of pounds in cash up front. Don't be tempted by quick money, you could end up with an environmental risk, flies, polluting liquids running out of bales of waste and even fire risks alongside the massive disposal bill.

We will investigate these two illegal waste incidents fully and take enforcement action if we can. However these farmers and landowners may have to pay significant sums to remove the waste legally. Waste crime is a serious issue diverting as much as £1 billion per annum from legitimate business and treasury.

Although these specific incidents occurred in Lincolnshire, we would not be surprised if this scam was attempted in neighbouring counties due to convenient transport links.

The Environment Agency provides impartial advice to customers, individuals and businesses to help them grow, our local officers will be happy to talk to you, can make public register checks whilst you are on the phone or you can make checks on our [website](#) for free, or you can call our Customer Contact centre on 03708 506 506.

The Highways Agency and county council's highways department and their contractors will always use legitimate waste carriers and sites for the reuse or disposal of waste. They may approach farmers and landowners to see if they want to reuse tarmac road planings or crushed rubble and concrete to repair road and yard areas but farmers need to register the [Ul waste exemption](#) with the Environment Agency and abide by the rules.

The vast majority of waste sites we regulate are well run and provide essential waste management services. The Environment Agency are here to help the legitimate businesses.

Waste stored inappropriately can create issues for neighbours like smells and pests. It can also have a detrimental effect on the environment and impact on rivers and streams. There is a high risk of waste fires due to the waste not being stored in the correct manner.

Everybody has a part to play to help solve the waste crime problem and make sure waste is managed responsibly. If you see or suspect illegal waste activities, report it anonymously to [Crimestoppers](#) or call 0800 555 111.

---

## **[Press release: Environment Agency takes a stand on illegal waste](#)**

Farmers, landowners, big and small business, and members of the public are being asked to be more vigilant after a number of incidents where large amounts of processed or baled waste has been dumped across the West Midlands.

Over the last 12 months the Environment Agency in the West Midlands has seen an increase of illegally dumped waste on public and private land. Fly-tipping is the responsibility of the local council however the Environment Agency becomes involved when the waste is more than 20 tonnes (about 20 cubic metres); more than 5 cubic metres of fibrous asbestos or 75 litres of potentially hazardous waste in drums or containers; or if it is linked to criminal business activity or organised crime.

## **What is being done to tackle waste crime**

Through the Government Spending Review 2015, nationally the Environment Agency secured an additional £23m to tackle waste crime in England, up to the end of March 2020. This is being spent across the country, targeting priority areas. £20m of this is from the landfill community's tax fund. It has been used locally to fund additional temporary staff to further target illegal waste operators and high risk sites of concern.

The Environment Agency are determined to make life hard for criminals and support legitimate business, proactively supporting these businesses by disrupting, and stopping, the criminal element backed up by the threat of tough enforcement action and prosecution. The new Disruption and Prevention team – part of the Environment Agency's National Enforcement Service – is leading the way in finding new approaches to disrupt waste crime and stop it happening. Working in partnership with law enforcement agencies, HMRC, DVLA and Companies House, as well as employing a number of techniques to track and trace vehicles and waste from different sites.

## **What businesses and the public can do**

Everybody has a part to play to help solve the waste crime problem and make sure waste is managed responsibly. The Environment Agency is asking members of the public to be vigilant; to contact them with information on anything suspicious as long as it is safe for people to do so. Dumping commercial waste like this is a crime. Individuals involved in such illegal activity can be hostile and we would urge members of the public to not put themselves in any danger if they encounter any such activity and to avoid any direct contact with the culprits.

Lisa Pinney, Environment Agency Area Manager for West Midlands, said:

It's crucial that all businesses understand their duty of care responsibilities for the waste they produce, who they allow to transport it and ultimately where it goes. Too often, when these responsibilities are misunderstood or ignored, we see the impact of waste crime where waste is deliberately dumped on land with no permit. This can cause serious pollution, put communities at risk and undermines legitimate businesses that are doing the right thing. And even if the landowner has no involvement, legally they may still be responsible for that waste and that could mean a large clear up bill.

Waste stored inappropriately can create issues for neighbours through smells and pests. It can also have a detrimental effect on the environment and impact on rivers and streams. If you see or suspect illegal waste activities, report it anonymously to Crimestoppers [online](#) or by calling 0800 555 111. Alternatively report it to the Environment Agency's incident hotline on 0800 80

## Notes to editors

We all create waste, and all have a responsibility to ensure our waste is handled correctly. Whether you're a business, local council or householder you must make sure you know where your waste goes so it doesn't end up in the hands of operators who break the law and dump it to avoid paying for its legal disposal. Illegal waste sites undercut legitimate business, can cause severe damage to the environment and misery for local residents.

Many businesses don't realise they have a legal Waste Duty of Care and could be committing an offence if their waste is dumped by an illegal operator. Hauliers are at risk of unwittingly becoming involved in waste crime by not asking the right questions about the loads they're collecting.

Make sure you know what your legal responsibilities are: [manage your waste responsibly](#)

Check the [public register](#) to see if a site is permitted or a waste carrier is registered

You could be breaking the law if your waste isn't managed properly. Visit [Right Waste Right Place](#) to help you comply with the law. You can also refer to the Defra [waste duty of care code of practice](#)

## [News story: Torcross sea defence repaired after Devon storms](#)

The Environment Agency has finished repairing Torcross sea defence after damage caused by the storms of February 2016.

Those storms saw large waves hit the sea defence when beach levels were low, causing cracks to appear along the promenade.

The repaired wall cost £2.4 million and reduces the risk of flooding to 51 properties. It is designed to withstand a severe storm, even when beach levels are low. Steel sheet piles have been installed directly in front of the existing line of piles with a new reinforced concrete capping beam. These double-length piles give the wall extra stability.

Steel sheet piles have been driven in front of existing piles and topped with concrete beams

The Environment Agency's Becky Richards said:

A huge thank you to all the residents of Torcross who have supported our repair work.

The project team worked hard to complete this repair quickly as possible, and our contractor, BMM JV, has done well to complete the works in time for the Easter holidays.

Local MP Dr Sarah Wollaston said:

Thank you so much to all those who have worked hard to restore the sea defences at Torcross, and to the community and agencies which came together during the anxious weeks following last year's storms to get things done.

The Environment Agency will inspect the defence every 24 months and monitor the repair during periods of bad weather.

A complementary project is underway to identify the best beach management options for Torcross. South Hams District Council is creating a Torcross and Slapton Beach Management Plan on behalf of The Slapton Line Partnership, to

which the Environment Agency will contribute.

Alan Denbigh, Chair of the Slapton Line Partnership, said:

Together we hope to identify the best long-term beach management options to reduce the impact of storms at Torcross.

We are planning events in summer 2017 for residents and businesses in and around Torcross to talk about the plan. Visit [www.slaptonline.org](http://www.slaptonline.org) to find out more.

Even with this sea defence, parts of Torcross remain at a high risk of flooding from the sea. High risk means that each year this area is at significant risk of flooding during storms due to waves.

Everyone has a part to play to protect themselves from the risk of flooding. There are some simple steps you can take now:

- Use our flood map to see which areas are more likely to flood first, deepest, or most often [by entering your postcode](#)
- Register for Floodline – if you're at risk of flooding, you may be able to receive flood alerts and warnings, completely free
- Be prepared – know what to do if flooding happens with a flood plan – [download a personal, business or even a community flood plan template](#)

To report an emergency flood incident in Torcross call our 24-hour incident hotline on 0800 80 70 60.

## [News story: South West Water fined for Devon sewage spill](#)

South West Water has been ordered to pay £86,000 in fines and costs for discharging sewage into Dawlish Water over a bank holiday weekend. The case was brought by the Environment Agency.

On 28 August 2015 an automatic alarm was triggered in Brook Street after a blockage in a pipe caused sewage to leak into nearby Dawlish Water, a stream that runs through the centre of the town.

The alarm sounded at 8.15am, but the water company didn't dispatch an emergency crew to deal with the problem until 11.40am. Instead of going to Brook Street, it went to Brook House in another part of Dawlish and reported nothing was wrong. It wasn't until a second team arrived, some 6 hours after the alarm sounded, that the discharge was discovered and steps were finally taken to stop the pollution.

The problem was caused by a brick which had somehow entered and blocked the sewer causing it to overflow.

This combined sewage overflow pipe was blocked and discharged into Dawlish Water

Dawlish beach was busy with holidaymakers at the time of the incident. Bathers were advised by an official from Teignbridge District Council to stay out of the sea and wash their hands. The Environment Agency declared an 'abnormal situation' and the bathing water was closed for more than 24 hours.

Levels of E.coli bacteria in Dawlish Water increased significantly as a result of the discharge, from 990 per 100ml upstream of the sewer pipe to 4,800,000 at the point of discharge. Further downstream in the walled section by the viaduct the level had reduced to 70,000, however children had been seen playing in the water in this area. Dilution in the sea meant there were safe levels of E.coli in the town's bathing water.

South West Water said it had tried to get a team to Dawlish as soon as possible, but their response time was increased because a crew was unavailable having attended sewer flooding of a property elsewhere overnight. A second crew was unable to attend due to technical problems with their vehicle.

Nigel Thomas-Childs, for the Environment Agency, said:

Water companies must respond promptly to emergencies to minimise any pollution or harm to the environment. This discharge occurred

over an August bank holiday when Dawlish was particularly busy. South West Water lost valuable time and took too long to find the blockage and deal with the overflow to the brook.

Appearing before Exeter Crown Court, South West Water Ltd was fined £80,000 and ordered to pay £6,202 costs after pleading guilty to discharging polluting material into Dawlish Brook, an offence under the Environmental Permitting (England and Wales) Regulations 2010.
