

[Press release: Committee members sought to help shape future flood plans in Lincolnshire and Northamptonshire](#)

New members are being sought for the Anglian Northern Regional Flood and Coastal Committee (RFCC) – helping shape and approve local flood defence plans, raise local levy funding and influence the future of the environment.

The Anglian Northern RFCC works with the Environment Agency on key schemes to reduce flood risk across Lincolnshire and Northamptonshire – for example the Humber Strategy, Louth & Horncastle flood reservoirs and Boston Barrier scheme.

The RFCC funds innovation and partner-led projects and plays an important role during flood incidents, supporting staff, colleagues and communities before, during and after an event.

Committee members have a critical role in supporting the Environment Agency and Lead Local Flood Authorities. We are looking for individuals with skills or knowledge in one or more of the following backgrounds:

- Community engagement and/or flood incident management
- Partnership funding & contributions, infrastructure and the economy
- Media, public relations & communications
- General flood & coastal risk management expertise

Applicants do not need to be technical experts in flood and coastal risk management, though some understanding of the processes and impacts of flooding are desirable. We need people who can think strategically, know how to engage and influence individuals, communities and networks, and understand the need for innovation and efficiency.

The Committee meets 4 times a year, though candidates may be asked to attend additional meetings. RFCC members are all appointed as impartial individuals in their own right and not as representatives of any particular organisation. It is important that the committee members represent the communities they serve. These are unpaid roles but reasonable expenses, including travel, can be claimed.

The Environment Agency is keen to hear from anyone who may be interested. More information and details about how to apply can be found on our [Anglian Northern RFCC page](#).

The closing date for applications is Wednesday, 10 May 2017.

If you have further questions, contact the RFCC Secretariat by [email](#) or on 0203 025 5877.

Corporate report: Nuclear Decommissioning Authority: University Research and Development Strategy

In order to successfully deliver our mission, NDA needs to ensure that it is technically underpinned by sufficient and appropriate R&D and that our estate has access to the skills and capability to carry out the mission efficiently and effectively on the required timescales.

University R&D plays an important role in this delivery through:

- maintenance and/or development of key technical skills required to deliver the decommissioning plans
- early-stage development of decommissioning technologies (e.g. technology at low technology readiness levels)
- application/adaption of existing technologies to radioactive environments
- informing the development of strategy and policy
- advancement and transfer of knowledge with regard to decommissioning
- providing fundamental understanding of underpinning science and engineering of key processes or technologies deployed on our sites
- identification of R&D opportunities arising from current and future projects

Press release: Angler caught fishing with six rods in illegal fishing crackdown in Yeovil

On 23 March 2017, at Yeovil Magistrates Court, Ryan Hughes, of Fallowfield Drive, Newport, was fined £440 for fishing with an unlicensed instrument and fishing with more than 4 rods.

Costs of £170 and a victim surcharge of £30 were also imposed – a total penalty of £640 after a prosecution by the Environment Agency.

Magistrates heard that on 6 September 2016, an Environment Agency enforcement officer found Mr Hughes fishing at Pavyatt Mill Lakes, Yeovil, with an unlicensed instrument – namely rod and line – contrary to Section 27(1)(a) of the Salmon and Freshwater Fisheries Act 1975. On 6 September, Mr Hughes also

fished with more than 4 rods and lines at the same time contrary to Byelaw 8(3) of the Environment Agency National Byelaws.

Mr Hughes was convicted in his absence.

Richard Dearnley, of the Environment Agency, said:

The majority of anglers fish legally and purchase a rod licence. We invest the money from rod licences back into fisheries improvements, fish stocks and fishing, this is essential for the future of the sport.

The minority of anglers that fail to buy a rod licence are cheating their fellow anglers and the future of the sport. In addition rod licence cheats risk a criminal conviction, a significant fine and could lose their fishing equipment.

During 2015-16 the Environment Agency checked more than 62,000 rod licences and prosecuted more than 1,900 anglers for rod and line offences resulting in fines and costs in excess of £500,000.

Anyone witnessing illegal fishing incidents in progress can report them directly to the Environment Agency's incident hotline 0800 80 70 60. Information on illegal fishing and environmental crime can also be reported anonymously to Crimestoppers on 0800 555 111.

You need a valid Environment Agency fishing licence if you are aged 12 or over and fish for salmon, trout, freshwater fish, smelt or eel in England.

[Corporate report: Scrutiny of Radioactive Waste Management: annual report 2015 to 2016](#)

The Environment Agency and Office for Nuclear Regulation's (the nuclear regulators) joint publication about their scrutiny of RWM's work relating to geological disposal of radioactive waste.

The nuclear regulators provide regulatory advice to RWM about implementing geological disposal.

This report explains what the regulators looked at and the main comments provided to RWM. It also highlights areas for RWM to improve.

RWM is making progress towards being an organisation capable of holding an environmental permit and nuclear site licence for a geological disposal facility.

The regulators will make sure that any future geological disposal facility meets their high standards for environmental protection, safety, security, radioactive waste transportation and safeguards.

For more information email the Environment Agency at geological.disposal@environment-agency.gov.uk.
