## **News story: Marine Management Organisation (MMO) issue authorisations to catch bass**

*Updated:* Date changed from 14 to 21 March 2017

In order to protect bass stocks and the sustainability of the wider marine environment from 22 February 2017 the MMO will be issuing letters to fishermen who, based on their track records, have authorisation to catch bass. The MMO will also send letters to those who do not have such authorisation.

The letters include details of a representation process through which fishermen can, on limited grounds, provide evidence to the MMO should they wish to challenge the authorisation decisions which have been made. The deadline for such representations is 21 March 2017.

The MMO action is a response to Article 9(2) of Council Regulation (EU) 2017/127 which fixed the fishing opportunities for certain fish stocks and groups of fish stocks, applicable in Union waters and, for Union fishing vessels, in certain non-Union waters in 2017.

[Read the bass fishing guidance.](#)

Phil Haslam (MMO Director of Operations) said:

“The bass authorisations help implement EC measures designed to manage effort in order to help protect and improve Bass stocks.

I would urge fishermen to read the letters they receive and familiarise themselves with the bass regulations and the representation process. Those that feel they meet the representation criteria and can provide the relevant evidence should do so at the earliest opportunity and certainly before the 21 March 2017 deadline”.

Full details of the [bass regulations and the representation process](#) have been published on the [MMO website](#).

Assistance is also available via [MMO coastal offices](#).

## [Press release: Shoreham flood scheme enters next phase](#)

A major flood defence scheme that will significantly reduce flood risk to over 2,300 properties in Shoreham and East Lancing has taken a step towards completion this week, with piling works at 2 of the project’s 10 phases now finished.

The huge jack-up barge, that has been working to install one of the new tidal flood defence piled walls in the town centre since November, will leave the site next week having completed its phase of the work.

Of the planned 10 construction phases, 3 have been worked on since the project started in October 2016, and work so far has been progressing well. The scheme will significantly improve the current ageing flood defences, and when the whole project is complete, in 2018, it will reduce the tidal flood risk to thousands of homes and a significant number of commercial properties in the area. It will also protect important local infrastructure such as the road network, railway line and Shoreham Airport.

Russell Long, Flood Team Leader at the Environment Agency, said:

Work on the scheme is progressing well, and further phases of work are set to begin later in the year. We are aware of the impact that the development of these schemes can have on local communities, and we thank the residents of Shoreham for their understanding during the works.

The Adur Ferry Bridge will need to be closed for a few hours when the jack-up barge leaves Shoreham next week (week commencing 27 February), and shuttle buses will be provided during this time. Exact timings of this operation will depend on weather and site conditions, and we will do all we can to keep the community informed of our plans. I'd encourage residents to monitor [@EnvAgencySE](#) on Twitter, go to [www.shorehamadurtidalwalls.co.uk](http://www.shorehamadurtidalwalls.co.uk), or visit the project's visitor centre to find out more.

The Shoreham scheme's dedicated project visitor centre is located at Beach Green Car Park, Shoreham-by-Sea, and is open between midday and 5pm on weekdays.
