

[Guidance: Algal blooms: advice for the public and landowners](#)

Algae naturally occur in inland waters, estuaries and the sea. Blooms can form when their numbers become excessive. This guide describes the features of algal blooms, how they can affect you and what you should do if you see one.

[Press release: Tata Steel make amends with £73,000 donation, following pollution](#)

Tata Steel UK Ltd (TSUK) paid the money to the Humber Nature Partnership, an organisation that delivers projects resulting in environmental, economic and community benefits. The payment follows a pollution incident on the Bottesford Beck.

On the 22 May 2015 after a call from the TSUK Environment Manager, Environment Agency officers found a heavy red coloured lubricating oil on Seraphim lagoon, the Bottesford Beck and in wetland channels of Ashby Ville Local Nature Reserve.

Following investigations it appears that the oil overflowed from an industrial bulk container as oil was being drained from a lubricating tank on the TSUK site.

Under the terms of this Enforcement Undertaking (EU), Tata Steel UK Ltd accepted an obligation to make a donation of £73,000 to the Humber Nature Partnership. Final plans for how the money will be used are still underway, but tree planting creation of wildlife ponds and ground works for an outdoor classroom that could be used by local schools are some schemes under consideration.

As part of the EU, Tata Steel UK Ltd has also agreed to take action to ensure that a similar incident does not recur and paid the costs of the Environment Agency.

Elizabeth Cooper, environment officer with the Environment Agency, said:

We work hard to protect people and the environment. In this case, we considered that the Enforcement Undertaking was an appropriate

way to sanction the company while creating a benefit for the local environment.

Serious pollution can have devastating effects on rivers, fields and wildlife.

Along with prosecutions, the Environment Agency use enforcement notices, stop notices and civil sanctions to either improve performance or stop sites from operating. It is making better use of the wide range of measures that are available to bring sites back into compliance as quickly as possible.

The Environment Agency's use of civil sanctions is in line with recent legislation extending their availability for more offences.

Civil sanctions such as these can be a proportionate and cost-effective way for businesses to make amends for less serious environmental offences.

The Enforcement Undertaking requires Tata Steel UK Ltd to:

- Make a donation of £73,000 to the Humber Nature Partnership
- Implement pollution prevention and restoration works
- Review refresher training for staff
- Site improvement works
- Pay Environment Agency costs

Failure to comply with an EU may result in the offender being prosecuted for the original offence. Details of Enforcement Undertakings accepted by the Environment Agency between can be found on [GOV.UK](https://www.gov.uk)

Statutory guidance: Bass fishing guidance 2017

Updated: Bass guidance updated

If you fish for bass commercially or recreation you will need to comply with the rules for:

- where you can catch bass
- how much bass you can catch
- the minimum size you can keep

[Press release: Company agrees to £50,000 charitable contribution amidst pollution allegations](#)

Integrated Waste Management (IWM) has agreed to pay £50,000 to the Lincolnshire Wildlife Trust following allegations of pollution in Winteringham.

In July 2015 the Environment Agency (EA) received a report of dead fish in the Haven Drain in Winteringham. Upon further investigation the EA found dead fish and low ammonia, indicating that pollution had taken place. 90 dead fish were counted, with EA officers estimating that 403 fish had been killed over a 4.4km stretch of watercourse.

EA officers traced the pollution back to the vicinity of Winterton North Landfill, a site which is operated by IWM. A leak as well as some blockage issues were found on-site.

Following the incident, IWM agreed to pay £50,000 to the Lincolnshire Wildlife Trust. It also agreed to put measures in place to prevent a similar incident from occurring in the future, and paid £7,041.70 in costs to the EA.

The Environment Agency uses civil sanctions, enforcement notices and stop notices along with prosecutions, to either improve performance or stop sites from operating. The Environment Agency's use of civil sanctions is in line with recent legislation extending their availability for more offences.

Civil sanctions such as these can be a proportionate and cost-effective way for businesses to make amends for less serious environmental offences.

Simon Mitchell, Environment Manager with the Environment Agency, said:

At the Environment Agency we work hard on a day-to-day basis to protect the environment. In this particular case of pollution, the impact on the environment was limited. The company co-operated with our investigation and responded quickly to the incident.

This is why we decided that an Enforcement Undertaking would be an

appropriate way to sanction the company while contributing positively to the environment.

We will still choose to prosecute offenders in the most severe cases.

The Enforcement Undertaking requires Integrated Waste Management to:

- Make a donation of £50,000 to the Lincolnshire Wildlife Trust
- Make improvements to site operations
- Pay Environment Agency £7,041.70 in costs

Failure to comply with an EU may result in the offender being prosecuted for the original offence. Details of Enforcement Undertakings accepted by the Environment Agency can be found on our [website here](#).

ENDS

Notes to editors:

- On or about 15 July 2015, Integrated Waste Management Ltd failed to comply with a condition of its Environmental Permit for a regulated facility at Winterton North Landfill Site. This was contrary to Regulation 38(2) of the Environmental Permitting (England and Wales) Regulations 2010.
- The EU was accepted on 31 August 2016.
