

Policy paper: Anglian river basin district river basin management plan

Updated: Updated document to fix broken links.

This document sets out the:

- current state of the water environment
- pressures affecting the water environment
- environmental objectives for protecting and improving the waters
- programme of measures, actions needed to achieve the objectives
- progress since the 2009 plan

It also informs decisions on land-use planning because water and land resources are closely linked.

It should be read in conjunction with the other RBMP documents.

Policy paper: Part 2: River basin management planning overview and additional information

Updated: Updated document to fix broken links.

Use this document to find out how the river basin management plans (RBMPs) were drawn up. It summarises the technical, economic and engagement processes used to develop each district's RBMP. It explains how the:

- water environment is managed
 - requirements of the water framework directive have been met
 - water environment is divided up and described
 - actions and objectives were identified

[Guidance: Transitional National Plan \(TNP\): guidance on the trading scheme](#)

Updated: We updated TNP: IED RTA1 Form.

Use these forms to comply with the TNP trading scheme. They are for use by appropriate regulatory authority staff and operators of large combustion plants.

Guidance for the TNP is available on request. Email tnphelp@environment-agency.gov.uk.

See the [TNP quarterly registers](#) to help you find an operator to trade with.

[Statutory guidance: Transitional National Plan \(TNP\): quarterly register](#)

Updated: Updated TNP register 2018: quarter 2.

The TNP is issued by Defra in accordance with Article 32 of the Industrial Emissions Directive (IED) and associated guidance.

The IED sets minimum limits for emissions of sulphur dioxide, nitrogen oxides and dust to the air from large combustion plants with a thermal rating equal to or greater than 50 megawatts.

The TNP scheme allows large combustion plants first licensed before 27 November 2002 to trade their annual allowances for sulphur dioxide, nitrogen oxide and particulate matter (dust) with other large combustion plants within the TNP scheme.

The TNP register is maintained by the Environment Agency on behalf of the 4 UK regulators:

- Environment Agency
- Natural Resources Wales
- Northern Ireland Environment Agency
- Scottish Environment Protection Agency

News story: Evaluation of Renewable Heat Incentive (RHI)

Over 80% of RHI applicants are satisfied with their new systems.
