

Statutory guidance: SR2015 No 18: metal recycling, vehicle storage, depollution and dismantling facility

Updated: Added to 'details' section: You can apply online for most standard rules environmental permits.

These standard rules allow you to operate a metal recycling site and a vehicle depollution and dismantling facility at a specified location.

These rules will permit the sorting, separation, grading, shearing, baling, compacting, granulating of cables and cutting using hand-held equipment only, of ferrous metals or alloys and non-ferrous metals for recovery as well as the recovery (including storage) of all waste motor vehicles.

The total quantity of waste that can be accepted at a site under these rules must be less than:

- 25,000 tonnes a year of waste metal
- 5,000 tonnes a year of waste motor vehicles

The rules will not permit the burning of any wastes, either in the open, inside buildings or in any form of incinerator.

You can apply online for most standard rules environmental permits.

Statutory guidance: SR2015 No 6: 75kte household, commercial and industrial waste transfer station with treatment

Updated: Added to 'details' section: You can apply online for most standard rules environmental permits.

These standard rules allow you to operate a household, commercial and industrial waste transfer station with waste treatment at a specified location.

The permitted activities must not be carried out within:

- 500 metres of a European Site, Ramsar site or Site of Special Scientific Interest
- 50 metres of any well, spring or borehole used for the supply of water for human consumption, including private water supplies

Specified waste cannot be treated outside a building within a specified air quality management area.

You can apply online for most standard rules environmental permits.

Statutory guidance: SR2015 No 5: household, commercial and industrial waste transfer station (no building)

Updated: Added to 'details' section: You can apply online for most standard rules environmental permits.

These standard rules allow you to operate a household, commercial and industrial waste transfer station at a specified location, provided that the permitted activities are not carried out within:

- 200 metres of a European Site, Ramsar site or Site of Special Scientific Interest
- 50 metres of any well, spring or borehole used for the supply of water for human consumption, including private water supplies
- 200 metres of any residential dwelling or workplace

You can apply online for most standard rules environmental permits.

Form: Licensed finishing units for cattle: application

Updated: Terms and conditions of the approval and operation of a licensed finishing unit (England) updated

A licensed finishing unit (LFU) is a type of TB unit which can only be located in the low risk areas of England. A licenced finishing unit (LFU(Wales)) is a type of TB unit, which can only be located in the low TB area in Wales.

An LFU in England and an LFU(Wales) both provide an outlet for the finishing of negative-testing cattle from multiple officially TB free (OTF) herds, where the animals are permanently under movement restrictions and housed under biosecure conditions.

Cattle may be sourced from multiple OTF premises and any area of England, Scotland and Wales.

Cattle moving into an LFU in England and into an LFU(Wales) must be compliant with all statutory pre-movement testing (PRMT) requirements, before they are moved to the unit. Cattle in the unit are exempt from post-movement testing, providing the statutory pre-movement testing requirements have been met.

Whilst LFUs in England and Wales are similar, there are significant differences and separate conditions of approval and guidance for the operation of these units apply. Further information, as follows:

For England

- LFUs were introduced in England to replace Approved Finishing Units (AFUs) in the low risk areas
- Cattle can only move from those units direct to slaughter or via a TB approved slaughter market or gathering in England
- TB testing is not required for cattle in LFUs but APHA have the option to test in exceptional circumstances
- Any cattle moving in from a holding that is subject to annual or more frequent TB testing will require a post movement test if a PRMT has not been carried out in the 60 days before moving into the unit

For Wales

- LFUs(Wales) have been introduced in the low TB area to provide an option for exemption from post-movement testing of cattle moving into a finishing enterprise
- Cattle can only move from those units directly to slaughter or to slaughter via a TB approved slaughter market in England or Wales or via a TB approved slaughter gathering in England
- Cattle in LFUs must be tested every 6 months
- Any animal identified as not receiving a statutory PRMT, when a statutory PRMT is required, in the 60 days before movement into an LFU(Wales), will require additional testing

Please refer to the guidance document (TR429/TR429w) for the full terms and conditions for the approval of an LFU.

[Guidance: Countryside Stewardship manual for 1 January 2016 agreements](#)

Updated: Passed 10 July deadline for late revenue claims and amendments.

Use the manual to understand the rules and conditions that apply to Countryside Stewardship (CS) agreements.

Use the options and supplements, and capital items documents:

- to understand the rules for each option, supplement and capital item
- for advice on carrying out options, supplements and capital items

Use the terms and conditions document to understand the rules of the scheme.

Use the record keeping documents to understand what evidence you need to keep to show you're meeting scheme requirements.

Use the [CS forms](#) to support your agreement.

Overlap of CS options with Ecological Focus Areas (EFAs)

In 2018, you can overlap the following CS options with EFAs declared on your Basic Payment Scheme (BPS) 2018 application:

- [AB1 Nectar flower mix](#)
- [AB3 Beetle banks](#)
- [AB4 Skylark plots](#)
- [AB5 Nesting plots for lapwing and stone curlew](#)
- [AB6 Enhanced overwinter stubble](#)
- [AB8 Flower rich margins and plots](#)
- [AB9 Winter bird food](#)
- [AB11 Cultivated areas for arable plants](#)
- [AB15 Two year sown legume fallow](#)
- [AB16 Autumn sown bumblebird mix](#)
- [HS2 Take historic and archaeological features out of cultivation](#)
- [OP2 Organic wild bird seed mixture](#)
- [SW1 4 to 6 metre buffer strip on cultivated land](#)
- [SW3 In-field grass strips](#)
- [SW4 12 to 24 metre watercourse buffer strips on cultivated land](#)
- [SW6 Winter cover crops](#)
- [SW12 Making space for water](#) (Higher Tier only)
- [WD3 Woodland edges on arable land](#)
- [WT2 Buffering in-field ponds and ditches on arable land](#)

Your CS options that share land with BPS claims (known as 'double funding') will receive a reduced payment rate. You can find the rate in the page for each listed option, under 'How much will be paid', and in the manual (section 3.14).

From 1 January 2019, you will not be able to overlap the 19 CS 'double funding' options with EFAs declared for BPS. You can place the options and EFAs in the same land parcel but they cannot overlap.

You can include hedges in both CS options and EFAs without payment deductions.

Revenue claims

The deadline for Natural England to receive late revenue claims and amendments was 10 July 2018. Natural England will not accept any further revenue claims in 2018.
