

Plastics found in Britain's marine animals

Microplastics have been found in the guts of every marine mammal examined in a new study of animals washed up on Britain's shores.

Engaging South Scotland's schools

The Scottish Funding Council (SFC) is working on a new project with SRUC to improve access to rural skills and entrepreneurship programmes.

Giant leap for salmon gill health

SRUC researchers have received funding to improve gill health and resilience among farmed Atlantic salmon – one of the industry's most significant challenges.

Mince under the microscope

An extensive scientific survey among Scottish supermarkets and butchers aims to determine the prevalence of bacteria such as "E. coli" and "Salmonella" in mince.

Rabbit out of the haggis

Game Chef of the Year finalist's twist on Burns Night favourite.
