## <u>ESMA publishes latest data on credit</u> <u>rating agencies performance</u>

CEREP provides information on credit ratings issued by Credit Rating Agencies (CRAs) which are either registered or certified in the European Union. It allows investors to assess, on a single platform, the performance and reliability of credit ratings for different CRAs, asset classes, geographical regions and time horizons over a given time period.

CEREP is updated on a semi-annual basis with statistics covering the preceding 6-month period: the reporting periods are January to June and July to December.
