

Competition: Commission agrees framework for dialogue on competition policy issues with Mexico

Commissioner **Vestager**, responsible for competition policy, said: *"We can all benefit from working with other competition authorities to promote fair global competition. This new framework for dialogue will give further impetus to our excellent cooperation with Mexico's competition authority. We have now formalised the basis for this cooperation and are committed to intensifying our ties, to the benefit of consumers and companies in Mexico and the EU."*

The arrangement between the EU's and Mexico's competition authorities provides a framework for dialogue on competition policy issues and for sharing views, as well as non-confidential information on individual cases.

In particular, the arrangement provides for:

- the exchange of information on competition laws and policies, on multilateral initiatives and advocacy efforts;
- coordination of the enforcement activities of the two competition authorities when working on the same or related matters. This is increasingly important, for example in merger assessment, where a merger can be subject to review in several jurisdictions;
- the possibility for one of the two competition authorities to refer a case to the other, if it involves anti-competitive practices carried out in the latter's territory;
- cooperation on technical matters, for instance through training or exchange of officials.

The signing of this framework for a dialogue on competition policy issues reflects the ambition of enhanced cooperation on competition matters between the EU and Mexico, to the benefit of both.

Background

The European Commission has been cooperating closely with competition authorities in countries outside the EU for many years.

At [bilateral level](#), the Commission has engaged in a wide range of cooperation activities with competition authorities in a number of non-EU countries on the basis of agreements or memoranda of understanding. Moreover, in its Free Trade Agreements, the Commission also negotiates a Competition Chapter which provides rules and disciplines on antitrust, mergers and subsidies.

In addition, the Commission participates actively in the competition-related activities of a number of [multilateral organisations](#) such as the [International Competition Network](#) (ICN), the [Organisation for Economic Cooperation and Development](#) (OECD), [UNCTAD](#), the [World Trade](#)

[Organisation](#) (WTO).

The main objective of this bilateral and multilateral cooperation with competition authorities is to promote convergence of competition policy instruments and practices across jurisdictions, exchange views on broader policy and enforcement issues, and facilitate cooperation with competition authorities in other jurisdictions on enforcement activities.

Mergers: Commission clears acquisition of General Electric Industrial Solutions by ABB

The European Commission has approved, under the EU Merger Regulation, the acquisition of General Electric Industrial Solutions (“GEIS”) by ABB Asea Brown Boveri Ltd (“ABB”), both global suppliers of electrical products and systems. The Commission concluded that the transaction would raise no

competition concerns in the relevant markets within the European Economic Area. ABB and GEIS are active worldwide in the manufacture and sale of electrical components and systems. The Commission carried out a broad investigation on a large number of markets and concluded that: i) the respective geographic areas of the companies' activities are complementary, with ABB being stronger in Europe and GEIS in the US; ii) the merged entity will continue facing effective competition from a number of large-scale rivals and specialised or local suppliers; iii) on markets where the merging companies are active at different levels of the supply chain, the Commission found that they would not have the ability to foreclose competitors, notably because alternative suppliers will continue to operate in the market. The Commission therefore concluded that the proposed transaction would raise no competition concerns in any of the markets concerned. A full press release is available in [EN](#), [DE](#), [FR](#). Mergers: Commission clears acquisition of Trioplast Industrier by Altor Funds

The European Commission has approved, under the EU Merger Regulation, the acquisition of Trioplast Industrier by Altor Funds, both of Sweden. Trioplast Industrier manufactures packaging solutions based on polyethylene film. Altor Funds makes private equity investments in a variety of economic sectors. The Commission concluded that the proposed acquisition would raise no competition concerns because the companies' activities do not overlap and the vertical links between their activities are limited. The transaction was examined under the simplified merger review procedure. More information is available on the Commission's [competition](#) website, in the public [case register](#) under the case number [M.8884](#). Mergers: Commission clears acquisition of Springs by AEA and BCI

The European Commission has approved, under the EU Merger Regulation, the acquisition of joint control over SIWF Holdings, Inc. ("Springs") by AEA Investors LP ("AEA") both of the US and British Columbia Investment Management Corporation ("BCI") of Canada. Springs manufactures and supplies window coverings such as blinds, shutters, curtains, draperies and retractable awnings. AEA is a private equity fund with investments in various sectors, particularly in value added industrial products, specialty chemicals, consumer and retail and services. BCI invests on behalf of public sector clients in fixed income, mortgages, public and private equity, real estate, infrastructure and renewable resources. The Commission concluded that the proposed acquisition would raise no competition concerns, given the lack of horizontal overlaps and vertical links between the activities of the companies. The transaction was examined under the simplified merger review procedure. More information is available on the Commission's [competition](#) website, in the public [case register](#) under the case number [M.8918](#).
