

Farmer sentenced after walker killed by cattle

Christopher Paul Sharpe, partner in J H Sharp and Son, has been sentenced for safety breaches after an 83-year-old man was fatally attacked by cattle.

Leeds Magistrates' Court heard how on 30 May 2020, David Tinniswood and his wife were attacked by cattle whilst following a public right of way across Ivescar Farm at Chapel-Le-Dale in Carnforth.

An investigation by the Health and Safety Executive (HSE) found that the couple were walking on a footpath that passed through the yard at Ivescar Farm, following a right of way that runs from the farm down to the road. They were accompanied by two border terriers. The couple were attacked by cattle that were grazing in the field with calves at foot. The 83-year-old man was trampled and pronounced dead at the scene and his wife sustained serious injuries.

Christopher Paul Sharpe of Ivescar Farm, Chapel le Dale, Carnforth, Lancashire pleaded guilty to breaching Section 3 (2) of the Health & Safety at Work etc Act 1974. He received a prison sentence of 12 weeks, suspended for 12 months, and was fined a total of £878 and was ordered to pay £7820.30 in costs.

Speaking after the hearing, HSE inspector Julian Franklin said: "A number of measures could have been taken to safeguard walkers using the path, while cattle and calves were grazing in that field.

"Firstly, not using that field for cattle and calves. Most farmers will have other groups of stock that can graze fields containing rights of way, so can reduce the risk of incidents by putting sheep in them, or they could take fodder crops from them. Cattle with calves can be put in fields without rights of way, away from members of the public, or can be segregated from walkers.

"Farmers should ensure they take all reasonably practicable precautions to protect walkers on public rights of way, especially when they are grazing cows and calves together, or bulls are present."

Notes to Editors:

1. The Health and Safety Executive (HSE) is Britain's national regulator for workplace health and safety. We prevent work-related death, injury and ill health through regulatory actions that range from influencing behaviours across whole industry sectors through to targeted interventions on individual businesses. These activities are supported by globally recognised scientific expertise. [hse.gov.uk](https://www.hse.gov.uk)^[1]
