The Council today approved a declaration on the fight against antisemitism and the development of a common security approach to better protect Jewish communities and institutions in Europe.

In its declaration, the Council acknowledges that Jewish communities in some EU countries feel particularly vulnerable to terrorist attacks, following an increase in violent incidents in recent years. It notes that anti-Semitic hatred remains widespread, as confirmed by the 2018 Fundamental Rights Agency report on antisemitism.

The declaration invites member states to adopt and implement a holistic strategy to prevent and fight all forms of antisemitism, as part of their strategies on preventing racism, xenophobia, radicalisation and violent extremism. It calls on member states to increase their efforts to ensure security for Jewish communities, institutions and citizens.
