

FRA supports Roma data collection in Czechia

Funded by the Norway Grants in Czechia the project should be implemented between 2020 and 2024. It aims at preparing a methodology tailored to the country for ethnic data collection tested in two waves of sample surveys. This will provide data on the situation of Roma in Czechia.

FRA is a programme partner for the [Human Rights, Roma Inclusion and Empowerment and Domestic and Gender-based Violence](#) programme. FRA provides a methodological support to the project promoter using experiences from its [EU minorities and discrimination](#), and [Roma and Travellers](#) surveys. This should lead to Roma data that is comparable with those collected in other EU countries (either by FRA – [Roma Survey 2020](#) or by national statistical offices – [Slovakia](#) or [Bulgaria](#)).

The data will help monitor the implementation of the EU framework for the Roma inclusion planned after 2020. The [Research Institute for Labour and Social Affairs](#), the project promoter, organised the meeting.
