

Friends of Riverside Nature Park event – all welcome! #dundeewestend

Pollinators and Wildflowers event – this Sunday 17th July 1pm to 3pm

Come along to a guided outing at Riverside Nature Park and learn about the many insects we have which pollinate our wildflowers and crops.

Not just bees but butterflies, wasps, hoverflies, beetles etc – all play their part. We need them for our survival yet modern agriculture, greenspace management and climate change are causing massive declines.

The wildflower meadows at Riverside help maintain a rich diversity of flowers and pollinators.

Come along, all ages welcome, children with appropriate supervision.

Bring magnifying glasses and cameras if you have them.

Meet at car park in Wright Avenue.
