

Getting things done – River Crescent and Hillside Terrace #dundeewestend

There has recently been significant levels of flooding on the roadway at the south end of River Crescent that residents brought to my attention.

I took this up with the council's Roads Maintenance Partnership Manager who helpfully updated me as follows :

"I can confirm we'll arrange for gully cleaning of this street.

"We are aware of wider problems in this area and the flooding team are working on a surface water management plan in conjunction with Scottish Water.

Our next challenge will be securing funding to implement the improvements identified from the study."

Separately, there were also road flooding concerns recently at the west end of Hillside Terrace and I am grateful to the Roads Maintenance Partnership for its prompt attention to this.
