

# Getting things done – River Crescent and Hillside Terrace #dundeewestend

There has recently been significant levels of flooding on the roadway at the south end of River Crescent that residents brought to my attention.

I took this up with the council's Roads Maintenance Partnership Manager who helpfully updated me as follows :

**"I can confirm we'll arrange for gully cleaning of this street.**

**"We are aware of wider problems in this area and the flooding team are working on a surface water management plan in conjunction with Scottish Water.**

**Our next challenge will be securing funding to implement the improvements identified from the study."**

Separately, there were also road flooding concerns recently at the west end of Hillside Terrace and I am grateful to the Roads Maintenance Partnership for its prompt attention to this.
