

Getting things done – Riverside Approach #dundeewestend

Residents have raised with us the very poor state of the railings in Riverside Approach around the rail bridge there.

The City Engineer advises us that :

“The wrought/cast iron sections are likely to be Dundee City Council’s. The timber sections facing the Tay Rail Bridge are Network Rail’s.”

His team has kindly agreed to approach Community Justice Services to hopefully get a project put together to have the railings brought back to standard.
