

## Getting things done – Riverside Approach #dundeewestend

As residents will be aware, the recent further consultation on a 'modal filter' at Riverside Approach that would have seen a temporary one-way arrangement as part of Spaces for People during the COVID-19 health emergency, resulted in a majority against so it will not go ahead.

I previously asked for some 'local traffic only' or similar signage to be provided to discourage non-local traffic and HGVs and am pleased this has been agreed to.

I also asked that the City Council revisits the idea of a pedestrian crossing on Riverside Approach between the Roseangle playpark and Magdalen Green and the Head of Sustainable Transport & Roads has responded helpfully as follows :

**"With regard to the pedestrian crossing proposal, this has been reviewed by our Traffic Team pre-Covid and the pedestrian counts didn't meet the levels required for change to the current arrangement.**

**Post Covid the pedestrian counts may be significantly different and we will review this location once the pandemic has concluded and future travel**

patterns have stabilised.”
