

Getting things done – Seafield Road and Westfield Lane #dundeewestend

Residents have highlighted that the path that connects the lane from Seafield Road (38 to 48) to the grassy area towards the bottom end of Westfield Lane becomes 'a bit of a mud pit' when it rains (as one resident accurately put it).

The lane itself is not a City Council adopted pathway but I have asked environment management who own the grass area if the surface of this short length of path to the grass area could be improved.
