

very beneficial.

The EG have now published an introduction to allergen QRA and an overview of inputs potentially needed for different QRA methods, when deemed feasible and necessary. The paper also introduces the EG.

Areas of focus include proactive assessments for food production under normal conditions, both in the upstream supply chain and in food production facilities, and reactive assessments as part of an allergen incident response. The paper offers insights into more detailed guidance for allergen QRA that will be published later in the year in open access as an ILSI Europe report.

The [paper is currently available as a pre-print](#).
